TeQ Shield™

Digital solutions for faster, safer turnarounds

In today's challenging economic climate, maintenance shutdowns or turnarounds demand innovations that help maximize productivity and reduce cost. Using TeQ Shield™ solutions, we help you gain project control and visibility in all phases of your plant turnaround. United Safety's integrated suite of safety services combines gas detection, video cameras, two-way communication, access control, permitting, quality control and assurance and monitoring of core body vitals to improve safety while reducing costs.
