

## TeQ Shield™ Aware

### TeQ Shield™ Aware – Safer people, safer assets through increased awareness

The upstream environment is one of the top high-risk industries with workplace safety concerns. TeQ Shield™ Aware is a family of intelligent devices designed to raise awareness and aid decision-making to prevent potential safety incidents from occurring.

It is a system of inter-related computing devices and objects working together to relay information with one objective- raising awareness of potential safety incidents to keep the connected worker safe.
