Description

TECA MyoJect Disposable Luer Lock Needles are pre-sterilized and include 30" color-coded lead wire for easy identification.

Note: Needles do not include Luer lock syringes.

TECA MyoJect needles are specially engineered for Botox Therapy and Nerve Block procedures. Allows injection of medication while recording EMG activity. Unique stainless steel needle design with an extra-sharp tip for patient comfort. A hypodermic needle that remains consistently sharp. Individually packaged in sealed pouches, sterilized by gamma radiation, for single use only.
