- **2021 PORTABLE MODEL: 212700C**
- **FAST 45W CAR CHARGER INCLUDED**
- **SMALLEST, LIGHTEST WEIGHT and PACKED with POWER:** The world's smallest portable CPAP battery to include 110V AC outlet with 27,000 mAh. Weight: 1.6 lb. Dimensions: 7.0" x 5.75" x 1.0".
- **WORKS WITH ALL CPAP MACHINES LIKE YOUR WALL OUTLET AT HOME:** Just plug in and sleep like home! So simple to use. No need to be an electrical engineer to figure out which battery will work with your machine!
- **ULTRA POWERFUL and LONG RUN TIME:** 1 - 1.5 nights on average or 7 - 12 hours depending on machine parameters. (NOTE: Use battery to power CPAP unit only. All CPAP batteries will lose 50% - 80% run time if heated humidifier and/or heated hose were used. See images for Run Time Chart with various machine brand and settings. We don't recommend using heated humidifier and heated tube with this CPAP battery.)
- **PERFECT VACATION and CAMPING COMPANION:** This powerful battery will also power any standard electronic device

Zopec Explore 5500 UPS CPAP Battery (54,000 mAh, Gold UPS Level) - 2021 Model!

~~\$599.99~~ \$479.99 Sale
