

EPLT

Engineering, Procurement, Logistics, and Transportation

You know BNSF Logistics as a global supply chain leader with keen understanding and experience within the logistics and transportation industry.

Efficiently moving your cargo will always be critical, but did you know that our engineering and procurement expertise is equally as deep?

Combining this expertise to ensuring your large, complex projects go as planned is key to **BNSF LOGISTICS EPLT SOLUTION.**

EPLT serves you where you need it most:

Expert approach to project planning

Flawless execution

The right people to meet key project goals

EPLT is a Project Logistics Solution Set

Services are tailored to your unique specifications and range from simple to highly complex. BNSFL's service and consulting expertise are paramount throughout all phases of every project and an unwavering commitment to delivering what matters to you are key to your project's success.

PROJECT MANAGEMENT ACED METHODOLOGY

ORIGIN & DESTINATION SERVICES

LOGISTICS & TRANSPORTATION

High Value/Risk Liability Assessment/Safety Monitoring
Insurance, Regulations, Hazardous Materials, Clearance Bureau

Engineering Services
Rigging, Crane, Drawings, Railcar Modifications, Securement, Safety, Fixture Design & Fabrication

Transportation Execution
Powered by experts in every mode: TL/LTL/Flat-Bed, Over-Dimensional, Ocean, Rail, Air, Intermodal.

Outsource Coordination
Subcontractor/Equipment Contract Management

Logistics Engineering
Network Design, Consolidation, Optimization, Site Selection Analysis

Mode Specific Expertise
Route planning, RoRo, Rail Siding, Cleaning/Stripping Rail, Customs Brokerage

International Exposure Review
Cross-Border, Customs Brokerage, Modes

Industrial Services and Light Construction
i.e. Concrete, Electrical, Plumbing

Project Specific Needs
Warehousing, Transloading, Inventory & Yard Management, Rail Cargo Network Clearance, Distribution Site Creation & Management

Project Execution by Industry Experts
Team Identification, On-site supervision, On-time/On-budget Analysis, Material Procurement, Safety Protocol Adherence

Site Preparation
Permitting, Packing/Crating/Labeling, Sequential Delivery, Loading/Unloading, Dunnage/Blocking/Tarping/Saddling, Leveling, Dismantle/Assembly

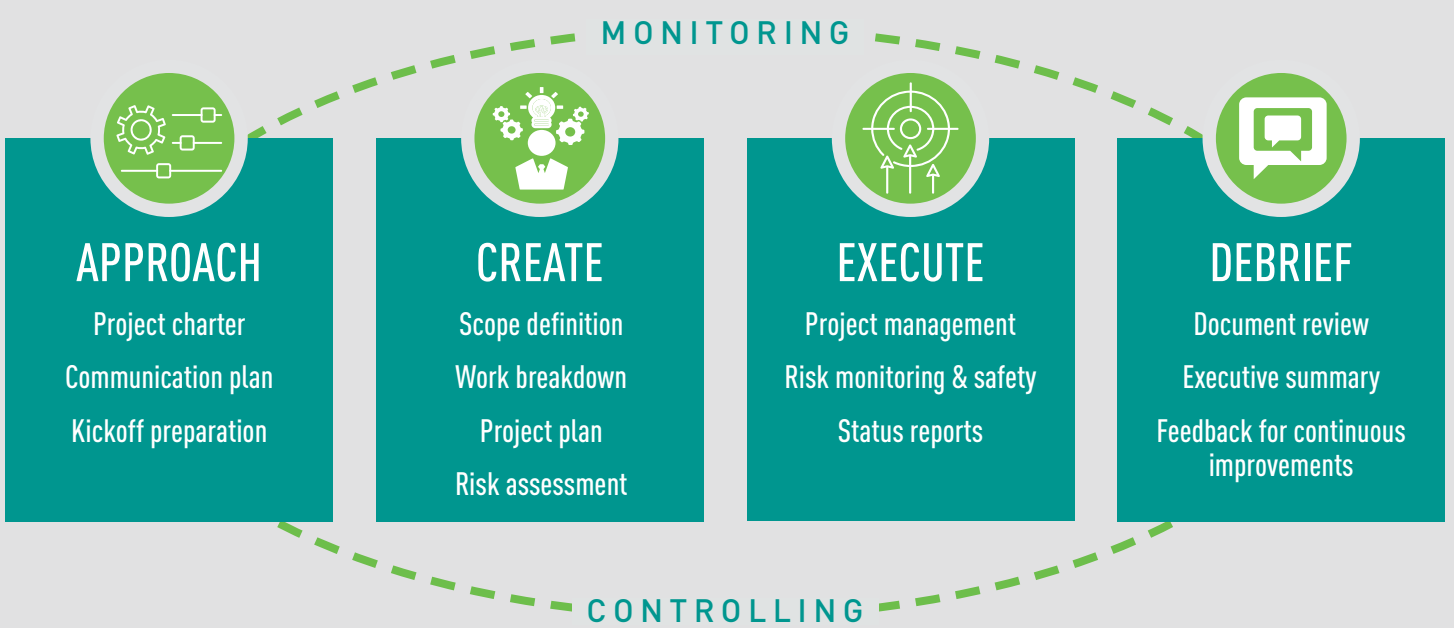

Procurement
Vendor Relationship Management; Proven, Repeatable Process, Localized Services, Fit for Complexity

BNSFL's service and consulting expertise are paramount throughout all phases of every project and an unwavering commitment to delivering what matters to you are key to your project's success.

4-STEP PROCESS

Ensures we not only stay on time, budget, and scope + Guarantees that the project will be 'ACED' every time:

From origin to destination, working with BNSF Logistics to deliver your projects, means that you will reap the benefits of a carefully planned and executed project management methodology.

Industries

RETAIL

SCENARIO | You are moving a consumer goods production facility from the US to Mexico on a short timeline and need a provider that will focus on service, speed and visibility.

From origin to destination, BNSFL's PMO coordinates procurement, facility dismantle, safe and efficient transport, cross-border management, and precise re-assembly with constant alignment to achieve on-time/on-budget goals.

INFRASTRUCTURE

SCENARIO | Your manufacturing warehouse containing raw materials, heavy machinery, and inventory will be relocated to a new location.

BNSFL EPLT team understands the all that is required to disassemble, package and secure, load out, transport, and prep the new site, including reinforced concrete slab for hydraulic press, product re-set and everything in between.

ENERGY

SCENARIO | You work in wind energy and need to safely transport, transload, store, and manage components from global factories to wind farms being erected across N. America.

BNSFL's deeply knowledgeable team develops multi-modal, multifaceted solutions to deliver what matters – transporting your wind components safely and on time to a rail-served, near-site transload & storage facility utilizing patented technology & years of proven experience.

TECHNOLOGY

SCENARIO | From high-tech products to those that work for more traditional businesses, tech is ever-changing and BNSFL has the expertise to serve the unique needs of this industry.

These crucial, premium products require first-class service and coordination that may include kitting, configuration, item level tracking and final installation, all while maintaining the speed and accurate execution of any "normal" product.
