

# CSI's Proprietary Network Payments

## A Proprietary Network for Secure Electronic Payments

For non-card accepting vendors, CSI offers secure proprietary network payments that bridge the gap when automated AP and electronic payments are the goal. Our proprietary network is similar to Automated Clearinghouse (ACH) transfers that push funds directly into the vendor's bank account, but we take it two steps further with invoice-level detail provided for each transaction plus a cash rebate on every bill paid.

## Let's Recap

### Fast and Automated

The network enables your business to automatically deliver payments that are fast and 100% guaranteed. Vendors are no longer waiting

### Secure

Funds are deposited directly into the vendor's bank account, which means there's no risk of lost or stolen checks, or errors from manual processing.

### Detailed

Behind each payment you'll find full transaction details for simplified accounting and reconciliation on both sides.

### Rebates

Just like our virtual cards, CSI offers cash rebates on every payment made through our proprietary network so you can increase revenue just by paying your bills.
