

FAQ

Most frequent questions and answers

WHAT IS OSHI?

Oshi is a hyper-verticalized local promotions marketplace. By leveraging the speed and efficiency of bitcoin technology we're able to offer game-changing incentives to merchants, consumers, and evangelists alike.

HOW DOES IT WORK?

Consumers: Browse and purchase promotions for local goods and services all from a single platform. Redeem the promotion in-store via a unique QR code.

Merchants: Craft unique, customizable promotions for your local community to view *and* purchase. Your customers instantly receive a QR code, you instantly receive their money.

Evangelists: Onboard local merchants and accrue bitcoin rewards when they sell via Oshi.

HOW DO I PURCHASE PROMOTIONS?

Payments are settled over Bitcoin's lightning network. Don't know what that means or how it works? No problem.

Just download the **Strike App**, complete the onboarding in less than a minute, pay your Oshi invoice, and unlock a revolutionary way to engage in local commerce.

CAN I PAY WITH OTHER CRYPTOCURRENCIES? ▲

Nah.

HOW DO THE REWARDS WORK? ▲

The rewards are denominated in satoshis, therefore they will fluctuate in USD value based on the current market price of bitcoin. A satoshi is the smallest unit of measurement for bitcoin. While there are 100 pennies in a dollar, there are 100,000,000 satoshis in a bitcoin.

You may choose to save, spend, or withdraw the rewards to your personal bitcoin wallet.

WHAT IF I DON'T WANT BITCOIN REWARDS? ▲

No problem!

Each standard promotion gives you the option to either save money or earn bitcoin 'cashback' rewards.

Say goodbye to coffee points, corporate cash, and rewards stars. Say hello to rewards freedom.

You may choose to save, spend, or withdraw the rewards to your personal bitcoin wallet.

AS A MERCHANT, WHAT IF I WANT TO RECEIVE DOLLARS INSTEAD OF BITCOIN? ▲

No problem! You can receive either bitcoin, USD, or a combination of both. Your choice.
