What our customers say

★★★★★

Thanks for letting me know Eddie. Just enrolled in your body movement course and really loving it! Love your step-by-step breakdown with historical context - finding it very helpful since learning from a couple teachers, I was never informed about the dance's "connection to the ground" (and where it comes from, among other things like counterposition which you and Princess explained very well). Looking forward to exploring things further with you. Muchas gracias! 😊
