Many disciplines.
One integrated curriculum.
Infinite possibilities.

USC's online Master of Science in Integrated Design, Business and Technology offers the only integrative cross-disciplinary master's curriculum that teaches the principles of design as the basis for creative problem-solving. The curriculum is designed by expert faculty from USC Iovine and Young Academy. Coursework will prepare students to think critically while identifying and analyzing opportunities; envision, propose and implement solutions; and adapt to change and uncertainty.

"The program really forced us to think differently and to make things happen amongst our peers. It's a great feeling coming together with people from different backgrounds to build towards a common goal."
– Ara Yardemian

About the Program

Why earn your Master of Science in Integrated Design, Business and Technology?

Tomorrow's creative leaders will need knowledge and expertise across multiple fields. Through this program, you'll work individually and in teams with other inspired thinkers and doers. You'll be online, but your classes will be live and interactive — an entirely new degree in a unique learning environment.

How to Apply

A collaborative, hands-on program delivered online.

Our classes are taught by esteemed USC faculty in a collaborative, engaging online setting. All class sessions are live, so you're there with classmates and professors — working through problems and sharing ideas.

About the Curriculum

You're a maverick and a maker who is at home in an unconventional environment.

Our one-of-a-kind degree will equip you with the skill set to launch your ideas — whether they be within your current company or outside it. Explore how this program can help you build your skills and advance your career.

How to Advance Your Career

Are you Ready?
