Great Article published by PubMed highlighting the benefits of Vitamin D against Influenza and Covid-19. Link in Bio

To reduce the risk of infection, it is recommended that people at risk of influenza and/or COVID-19 consider taking 10,000 IU/d of vitamin D3 for a few weeks to rapidly raise 25(OH)D concentrations, followed by 5000 IU/d. The goal should be to raise 25(OH)D concentrations above 40-60 ng/mL (100-150 nmol/L). For treatment of people who become infected with CO... See More

Vitaminerals is in Belton, Texas.
February 21, 2020

Thank you again to @chirotxas for allowing Vitaminerals to be a part of last nights event. It was a pleasure speaking and wonderful to finally meet everyone.
