The aTouchAway app is a mobile communications platform designed for healthcare professionals and care members seeking to dramatically improve the efficiency ratio and communication between clients and their circle of care.

With the aTouchAway; the circle of care members and home-care clients can easily communicate with one another across our secure, mobile communications platform. Home-care clients easily and efficiently communicate to their care members and professionals through secure video conferencing and sharing of their unique care plan information.

Benefits & Capabilities...

- Overall Better Client Experience & Outcome: aTouchAway significantly increases the overall care experience of the client and reduces readmission rates.

- Access Real-Time Care Plan Information: With aTouchAway, all care plan information can be easily accessed and shared by clients and care members.

-Access Client Metrics & History: Review client metrics in an organized, real-time platform.

- Secure Video, Picture & Text Communications: Connect clients, family, or care members instantly through secure mobile communications.

- Dramatically Increase Patient Care Efficiency: aTouchAway dramatically increases the efficiency ratio between clients and care members.

- Keep Family Close: With aTouchAway, clients can easily stay connected with their loved ones when

they need them most through video or text communications.

- And Much More!

                                                  3

Very emotional to see a loved one in icu but we are so grateful to all who helped James. Any questions we asked they tried to answer them. We as a family of James will be forever grateful for everyone's help. To be able to see him gave us great reassurance that he's in the best care. To be able to s...

                                                  4

Very good from my end.Not sure of father's screen.If not already on home screen can you add icon with words-Can't hear.-Can't see, icon & words reconnecting automatically. Original installer per user can figure out if one or more options should or should not be available.Most importantly can you add...
