

ATLAS

PRESSURE CONTROL

Atlas Pressure Control was founded to provide innovative quality products, exceptional service, and the best customer experience possible. These elements are within everything we do, from our innovative products and services to our highly experienced personnel who strive to exceed our customer's expectations. These, coupled with our Titan™ digital information support systems that deliver real-time job information to all stakeholders, bring a unique experience for everyone involved.

At Atlas, we are doing things differently, which sets us apart from the rest.

Atlas, Different By Design

OUR DRIVE

We are driven at Atlas Pressure Control to provide a superior customer experience in all that we do. Our 5 Star Platinum Standard backs this commitment. This standard serves to define, communicate, and direct our commitment to performance to our customers. We want to ensure our customers receive exceptional value from our steadfast commitment to safety, reliability, quality, and response.

OUR CAPABILITIES

Atlas designs, manufactures, sells, and rents a full spectrum of highly engineered pressure control products. We offer a complete range of wellhead systems, Frac rental products, and services that deliver safety, reliability, efficiencies, and performance. Our focus is on unconventional oil and gas wells supporting drilling, completions, and production operations.

Our engineering team supports and maintains our comprehensive product lines with the latest 3D software, analysis, and evaluation tools to ensure each design exceeds expectations. Designs are fully developed and implemented to the newest API 6A standards. Our comprehensive Quality Management System (QMS) ensures that all aspects of design, manufacturing, assembly, and testing achieve the highest quality products possible.

Atlas maintains a network of in-house and partner manufacturing and repair avenues to deliver API 6A quality products quickly and effectively.

OUR PRODUCTS

★ Wellhead Support

Atlas' complete line of Assurance™ Wellhead Systems offers compact drill-through performance with an unyielding dedication to maintaining field personnel safety and rig time efficiencies. Seven unique systems are expertly designed to address basin-specific drilling requirements and needs. Each system incorporates innovative technology that ensures reliability and performance. Our array of compact multi-bowl designs use nested or independent load shoulders, quick connect BOP solutions, and thru-diverter technology that optimizes rig efficiency over conventional methods, making them perfect for pad drilling. Advanced tubing completion designs utilize internal Sure-Lock™ Technology to positively retain components with improved centralization of mandrels, mitigating rig alignment challenges. Atlas' unique At-Well™ Service delivers knowledge and experience when it is time to make changes to a well. Our experience offers guidance in wellhead identification, selection, and sourcing to support wellhead re-completions, abandonments, and more.

★ FRAC Support

We are focused on supporting frac operations with both equipment and technology, keeping safety and reliability at its core. Our advanced Kyber™ Technology Valves blend design technology, optimal material selection, and years of knowledge. The result is a valve that offers improved safety and performance when used in FRAC operations. Atlas' Kyber™ Valve Technology delivers new heights in FRAC valve performance on the well or from one of our custom-designed Skid Mounted Zipper FRAC Manifolds. These manifolds offer easy placement, set-up, and access on multi-well pads.

Atlas' Relia-Frac™ Services provide precise fluid management during FRAC operations to maintain control, reduce NPT and ensure safety. Our experienced personnel can remotely and safely operate and grease the valves on the stacks and manifolds during FRAC operations. This unique remote approach can also support additional services, like wireline and other services, to be conducted while FRAC operation continues contributing to improved overall economics.

OUR SERVICE

Excellent service begins with great people, a culture that fosters responsibility, and always doing things right. Atlas understand this and is committed to ensuring that we provide the best possible customer experience in everything we do. Our service facilities are strategically located to provide quick and reliable support 24 hours a day, 7 days a week. Each service support location is staffed with trained and experienced field service personnel and leadership to respond to wellhead, FRAC, and other customer needs. Equipment, tools, and trucks are continually inventoried, tracked, and maintained to ensure we can answer with the best support possible. Our shop and field technicians are routinely trained on our equipment, processes, procedures, driving, and HSE specific to their roles, ensuring consistency and reliability of our products and service.

OUR CUSTOMERS

We recognize it is easy to say you provide outstanding products and excellent service. However, at Atlas, we are building a future on it from our 5-Star Platinum Service Standard to our innovative equipment designs and our Titan™ digital technologies. Our experienced personnel are committed to doing things better.

We invite you to experience what makes us different and what sets Atlas apart from others.
