

LEED Certified Steel Production F x +
bigriversteel.com/about/leed/

OUR ENVIRONMENTAL POLICY IS COMMITTED TO:

- Providing a safe and healthy workplace by training our team and equipping them with the necessary resources to safely accomplish their daily activities.
- Complying with all applicable environmental and safety laws, regulations, permits and agreements.
- Acting responsibly to minimize or prevent negative impacts to the environment, including air emissions, solid and hazardous waste management, reducing water usage and the safe use of chemicals.
- Promoting pollution prevention and environmental awareness by training our team and taking steps to conserve resources through energy conservation and recycling.

LEED Certified Steel Production F x +
bigriversteel.com/about/leed/

- Promoting pollution prevention and environmental awareness by training our team and taking steps to conserve resources through energy conservation and recycling.
- Implementing, evaluating and continually improving our environmental, health and safety policies and program.
- Evaluating our policies and communicating our environmental performance on a routine basis.

Big River supports this policy by holding all employees accountable for ensuring safety, environmental compliance and responsible stewardship to people and our planet.
