BEST PLAYERS USE THE BEST BLADES

TYLER MOTTE | NHL FORWARD | VANCOUVER CANUCKS

"I trusted the blades after my first skate. I felt more balanced and confident on my edges. I also noticed more glide throughout my stride."

THE BEST BLADE. PROVEN.

With over a decade of research and development, Flare Skate Blade has become one of the most innovative performance-enhancing technologies that is trusted by players in the NHL, AHL, CHL, KHL, and the Olympics.

FLARE SKATE BLADE | SILVER

Precision-crafted in Canada, our Blades are manufactured to an optimum hardness from sword-quality Swedish steel.

The 6 degree angle translates to decreased friction, which provides optimal glide and maximum speed; gives you a better edge which creates more bite on tight turns; for an unparalleled experience offering superior stability and control that no other blade can match.

LEARN MORE

FLARE SKATE BLADE | DLC

Our newest Blade is created from proprietary NASA technology. The Diamond-Like Carbon coating increases hardness and durability, allowing for maximum performance in addition to the scientifically proven advantages offered by Flare's unique, patented design.

When applied to Flare Blades, the DLC coating will reduce friction even more than Flare's already proven 21%; and prolong edge retention, meaning less sharpenings, no need for in-game repairs, and provides even better bite and grip on stops and turns.

FLARE SKATE BLADE FOR BAUER TUUK LIGHTSPEED EDGE®

Bauer®

121210

\$179.99

Steel for Bauer Tuuk Lightspeed Edge® Holders.

Flare Skate Blades are precision-crafted in Canada, from sword-quality **Swedish steel**.

We are happy to sharpen your new Blades for you prior to shipping at no additional charge. Because of the 6 degree Flare our Blades offer, allowing for Tighter Turns, Faster Glide, and More Control, our **Athletes are required to adjust their Hollow**.

A 1 1/8" Hollow on Flare Blades (5/8" on traditional blades) is most common, but you are welcome to adjust to your skating style

A 1 1/8" Hollow on Flare Blades (5/8" on traditional blades) is most common, but you are welcome to adjust to your skating style.

Please view our [Hollow Conversion](#) chart to discover your [Hollow Equivalent](#).

Holdings not included.

While most users do not feel the need to Profile Flare Blades due to the already increased glide and turning capabilities, if you insist on profiling your Flare Blades please email info@flareskateblade.com with your requested profile before placing an order. We will get back to you with the additional cost required to profile your blades.
