Waging A War On Pathogens

The mission of Virox Technologies Inc. is to equip the entire spectrum of global markets with state-of-the-art antimicrobial technology in the war against germs. Our company is dedicated to the development, optimization, and adaptation of a fundamentally new approach to this challenge — an approach that has been validated and endorsed by the scientific community and adopted by market leaders in a broad range of industries.

We believe that there is no longer the need to compromise on efficacy of application, or trade off on either personal safety or environmental integrity by harnessing the disinfecting powers of hydrogen peroxide. Our disinfectant technology is a synergistic blend of commonly used safe ingredients that appear on the EPA inerts list and the FDA's generally regarded as safe list.

For the first time, Virox has developed a new standard of performance. **The science is here, and the time is NOW.**

As a research-driven company, Virox currently sells house branded and private label products, and partners with market leaders in an array of industries, who have all validated the scientific claims and market acceptance of our patented technology.

Virox is committed to innovating, developing and improving peroxide based, environmentally sustainable cleaners and disinfectants that allow our customers to reduce their environmental impact.

“ A focus on human and environmental sustainability is a legacy we will pass on to future generations.”

Randy Pilon, President & CEO

Awards and Associations

Proud To Be A Leader

Virox has long prided itself on developing and manufacturing cleaners and disinfectants that provide a safer and greener alternative to end users, occupants and the planet. Proof of this comes with multiple awards and recognition for sustainability, as well as several green certified products.

AWARDS

- **LEED® Silver Certification**

From the U.S. Green Building Council (USGBC), becoming the first chemical manufacturer capable of not just developing EcoLogo/UL and Green Seal Certified products, but also manufacturing them in a LEED-certified facility;

- **EcoLogo Certified**

AHP® was the FIRST disinfectant technology to receive EcoLogo approval in Canada as a green certified disinfectant cleaner;

- **EPA Safer Choice**

- **Partner of the Year Award**

For Innovation by the Safer Choice Design for the Environment;

- **Safer Detergents Stewardship Award (SDSI)**

Champion Status (highest level) for AHP® in the EPA's Design for the Environment SDSI Award;

- **Green Guard**

AHP® validated by GREENGUARD an industry-independent, third-party testing program for low-emitting products and materials;

In Good Company

Virox Technologies Inc. Partnerships

Our globally recognized and respected strategic alliance partners have demonstrated brand equity unparalleled in their respective markets, through joint development of high quality products, sustainable innovation, and superior end-user experience.

Pushing Onward & Upward

Constantly Evolving

Through its Open Innovation philosophy, Virox Technologies has developed research and development capabilities to optimize ongoing innovation of its technology to address commercial opportunities in the \$20+ billion global market for cleaning and disinfection products.

Innovate. Formulate. Educate.

There are over 8000 disinfectant products in North America and that number is quickly increasing, making it more difficult to select the right product, match it with the right protocol and conduct the right training to prevent the spread of infectious disease.

Not to worry, we're here to help.

Manufacturing & Operations

Experts in Manufacturing Hydrogen Peroxide Based Products

Virox is a full service manufacturer focused exclusively on Hydrogen Peroxide-based products.

In our 60,000 sq. ft. facility the Virox Manufacturing Group is responsible for implementation and monitoring of quality manufacturing and environmental systems. Quality begins with scrupulous vendor selection, testing

of incoming raw materials, ongoing employee training programs, constantly improving plant procedures and testing of finished products.

In addition to ISO 19001 and 14001 standards, Virox Technologies Inc is a Health Canada, US EPA as well as US FDA licensed establishment which operates as per GMP (Good Manufacturing Practices) Guidelines from HPPFBI (Health Products & Food Branch Inspectorate) and quality system regulations (21CFR820).

**VIROX TECHNOLOGIES
GLOBAL REACH**

Virox Technologies Inc. is committed to innovating, developing, and improving peroxide based, sustainable cleaners and disinfectants to improve

the health of people and animals all the while reducing their environmental impact. This is why **One Health** is at the core of all our initiatives.

The science is here
and the time is NOW.
