

Implementation and Support

You deserve experienced consultants who care about your success

At Nordic, we believe you deserve the industry's most experienced consultants who understand your specific needs and can guide you. You deserve consultants who care about your success and take pride in your organization the way you do. You should have consultants who hit the ground running, mentor your team, and leave you in a position for long-term success.

We are those consultants.

Healthcare consultants charged with installing software and systems

Many healthcare organizations don't have the talent and expertise in house to successfully complete projects that will move their technology and operations forward. We provide experienced professionals to assist with implementations, connecting mission-critical health technology. Nordic maintains a deep bench of talent to make sure we have the people needed to execute projects across the full landscape of clinical information systems.

Program and Project Management Office

Project Management

Application Total Cost of Ownership

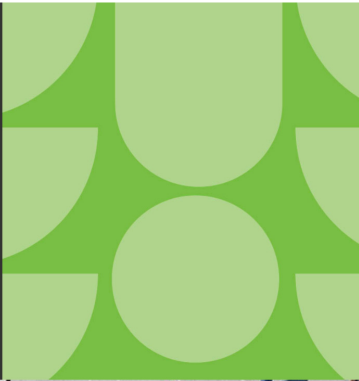

ERP

EHR Data Conversions and Interfaces

Training

EHR Implementation and Affiliate

Nordic's team of more than 1,400 experienced consultants own your success, mentor your team, and leave you in position for long-term success.

You need experience and expertise

You may not have all the experience, expertise, and resources on hand for a successful project that can scale quickly and meet your organization's strategic needs.
