

## Easy Integration

Building a new health-related app? Need a COVID-19 collection site? Need to connect to our secure HIPAA compliant patient portal? Whatever your needs, we offer a full suite of technology that's quick, secure and easy to integrate with your organization.

## Customer-Centric

Give your consumers patient-friendly test results and educational content via our secure online patient portal. From viewing laboratory test reports to paying bills, we make it as easy and quick as possible. We've even integrated our test results with Health Records on iPhone in the Apple Health app.

## Forward Thinking

Proactive, rather than reactive, our development team is constantly thinking ahead of the societal curve. In this ever-evolving world, your patients and customers need flexible, instant results no matter where they are: at home or on the go.

## Robust Reporting

**Global CareIndex**, BioReference's proprietary data and analytics platform, offers easy-to-understand, custom and cumulative dashboards and reports to help organizations quickly compare and analyze laboratory test results.

## Unified Patient Experience

With a suite of integration options, we are ready to create a user-friendly testing journey for your customers.

- Consumer-friendly technology
- Open APIs – scheduling, ordering and resulting
- EMR and LIS interfaces
- Robust SDKs
