This 14 Tooth Belt Sprocket sits on top of the power head. The belt goes around this sprocket and the teeth on it grip to the belt so it stays on track. This replacement belt sprocket will allow you to quickly replace your old sprocket to get your garage door opener back up and running smoothly.

- Compatible with the ReliaG 600 models 1024, 1042 and ReliaG 800 models 2024, 2042 (with belt rails)
- Strong steel genuine Genie Replacement Part
- Includes 1 belt sprocket 2 Screws, 2 Nuts and replacement instructions

**SKU:** 38416A.S

In stock! Usually ships within 24 hours.

**easy to replace, working greatly**

Review 1

Votes 0

It was fairly easy to replace the part, and it worked greatly after the replacement.

**14 Tooth Belt Sprocket**

The replacement sprocket is all medal and will not break down as does the original sprocket. It is easy to change out and works extremely well. The price is very reasonable, but you will never be reimbursed for your time. Time is money! Its just to bad that there is ever a need to replace the original sprocket. The original design was sub par and there should never have been a need for replacement.

**Works good**

Product itself worked perfect. Just didn't realize there would be import charges and extra shipping fees so make sure you read everything or you may end up spending a little more than expected. my fault

Genie 14 Tooth Belt Sprocket – The Genie Company  
you may end up spending a little more than expected, my fault.  
Otherwise product works perfect and cheaper than replacing the  
opener , easy to install too

**Finally, an all steel sprocket with no plastic !**

I needed this sprocket because my garage door opener Genie model 2042 had a PLASTIC belt drive sprocket that had just plain disintegrated.

But the 38416A.S sprocket could be bought from Genie as it is was obsolete.

Every one of many multiple third-party suppliers on the web that listed this sprocket said it was obsolete and could not be purchased.

My 2042 opener was still like brand new having been purchased just a few years ago from Loughs.

So, because I could not obtain a 15-dollar part, I had to replace my 2042 opener with a complete new \$250 garage door opener.

But . . . before I replaced it a Genie representative contacted me and informed me that due to many requests for this sprocket part 38416A.S, it was being re-manufactured and reactivated and was no longer obsolete.

I was extremely pleased to be able to finally buy this sprocket which is now made from solid cast steel and NOT plastic.

I have installed this new all steel sprocket and my 2042 opener and it is now good for many more years of service.

## QUESTIONS & ANSWERS

Ask a Question

**Q Can I see the sprocket replacement instructions before I buy the sprocket, to make sure I can do it?**

**A** You can view the sprocket replacement instructions here (https://cdn.shopify.com/s/files/1/1470/8272/files/38416A.S.pdf?5119).

**Q I have 2042 opener, will the opener need to be removed to change the sprocket**

**A** It is recommended in the instructions to take it down whole replacing the sprocket.

**Q I have a 0.5 HP Promax garage door opener that I am considering replacing. Does Genie sell a 0.5 HP garage door opener with a battery backup that I purchase in California. I have only been able to find a 2 HPc that I believe is way more powerful than I need, even though my door is a single piece and not a sectional type. If so, please let me know what the name and model number are so that I can order one.**

**A** The 2Hpc Machforce is the only one sold in retail right now with a battery back-up that will work on a one-piece garage door. You can contact a local Genie garage door dealer in your area for other options. If you visit www.geniecompany.com and enter your zip code you can locate dealers in your area.
