If you have trouble judging where to stop in your garage to allow clearance for the door, the Perfect Stop Parking System (GPS-R) is the solution to your worries. No more getting in and out of your car to see how much more space you have! With the easy-to-install system, just drive forward in your garage until the yellow ball touches the windshield, and you'll know you're parked at the same distance every time you enter your garage.

The foam parking ball is mounted to the ceiling and lowers into place when the garage door is opened. It retracts when the door is closed, so it isn't in your way. Compatible with all garage door openers and safe for your vehicle, the Universal Perfect Stop System is simple but extremely effective. The system includes a yellow ball, string, mounting hardware, and 1 Year Limited Warranty.

- Perfect Parking Indicator. Ideal for judging stopping distance in your garage to allow clearance for the door behind your car.
- Compatible with All Garage Door Openers. No matter what system you use for your garage door opener, the Perfect Stop Parking System will guide you to your parking place.
- You will get quick and easy installation with this garage parking aid. The system mounts from the ceiling, with all hardware and instructions included.
- Garage Parking Guide. The Perfect Stop sensor ball lowers into place when the garage door opens and retracts out of the way when the door closes.
- Safe for Your Car. Foam parking aid is gentle on your windshield and will not scratch or dent your vehicle.

Ames, IA

**Parking Aid.**

Review 1

Vote 1

We had a couple of these at our last house. They worked exceedingly well in keeping my other half from creating a new entrance into our house. As such, I expect that we will have the same success in our current house. Installation was simple. Directions were easy to follow, though, I did have to call for additional measurements. Great product!!

Review 1

**Works great!**

Vote **1**

It is nice to pull into the garage and not have to get out of the car a couple times to make sure I have pulled up far enough. Now I just pull in until the ball touches my windshield and know that I am in the right spot!

## QUESTIONS & ANSWERS

 [Ask a Question](#)

**Q Can this be used for 2 cars side by side in a garage? thus, not the center but 2 sides.**

**A** No, the ball would have to be in the center where the garage door opener is.

**Q There are no instruction on how to install in a 10' garage with a 8' door. The string seems long enough but I haven't figured out the correct way to install it. What are the instructions for this setup?**

**A** You can view the perfect stop parking instructions here ([https://www.geniecompany.com/data/products/accessories/manuals/perfect-stop\\_instructions\\_eng-fr-spa.pdf](https://www.geniecompany.com/data/products/accessories/manuals/perfect-stop_instructions_eng-fr-spa.pdf)). If you need assistance you can also contact our customer service support at 1-800-354-3643.
