FEATURES

The Sotera SS435BX700 is a 12V DC non-explosion-proof chemical transfer pump that is capable of producing up to 13GPM at 15PSI (1 Bar) maximum pressure. The pump utilizes a glass-reinforced polypropylene housing that is designed with Santoprene® diaphragms, EPDM elastomers, Chemtraveller - Short Frame with 825 digital meter. The SS435BX700 is designed to transfer agricultural chemicals, mild acids, soaps and water. Please always refer to the Sotera Chemical Resistance Guide for compatibility. This pump includes 1" accessories such as suction and discharge hose, ball valve nozzle with anti-drip tip, female camlock coupler, along with various fittings and clamps. All gaskets and seals are EPDM on this pump.

- Flow rates up to 13GPM
- Maximum outlet pressure 15 PSI (1 Bar)
- 8" Hg 'Dry Lift' [9 ft (2.7M) of water]
- Maximum particle size up to 0.100" diameter
