

The landing page features a dark blue header with the 'check' logo and navigation links: Home, Product, Developers, Company, and Blog. On the right, there are 'Login' and 'Contact Us' buttons. The main content area is split into two columns. The left column has a large white text block: 'Build a payroll product your customers will love'. Below this is a smaller paragraph: 'Build a fully native payroll product without starting from scratch. Quickly develop against our leading API. Don't have the developer bandwidth? Leverage our payroll components to get started faster.' At the bottom of this column is a 'Request Demo' button. The right column shows a 'Create Payroll' terminal window with a curl command and a 'WorkScout Company Dashboard' screenshot. The dashboard shows a 'Payroll' section with four green checkmarks and a summary box: 'TOTAL PAYROLL \$505,800' and 'Total employees paid 120'. A user profile for 'John Appleseed' is visible at the bottom.

The most robust payroll API platform

Check's API provides the tools to build a full-featured payroll product customized for your market. We've taken the complexity out of building a payroll product so you can focus on what matters most, your customers.

- Worker types**
Check supports full-time W-2 employees, 1099 contractors, part-time and seasonal employees, and more.
- Payment timelines**
Check supports 4 day, 2 day, and, in some cases, faster pay timelines for businesses.
- Comprehensive webhooks**
Check's fully observable platform provides webhook support for all critical API resources.
- Accounting integration**
Check integrates with your accounting software simplifying payroll for your customers.

Build faster with components

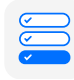

Whether you are ready to build a fully native payroll product or want to speed things up by leveraging our whitelabeled components, Check has you covered.

- 01 Check Onboard
- 02 Check Components
- 03 Check Express

Check Onboard

An embedded onboarding flow for customers and their workers

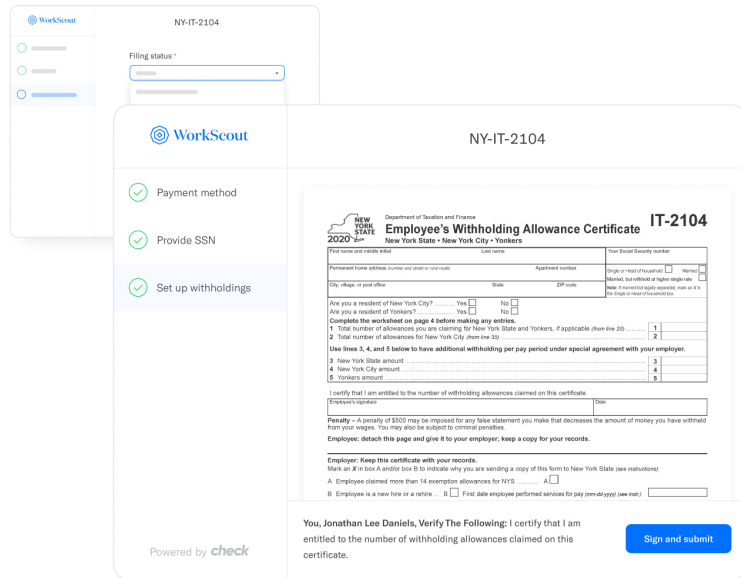

- 

Connect it to your existing data flows, reducing customer re-entry
- 

Onboard customers seamlessly with a straightforward process
- 

Embed a whitelabel employee or contractor flow
- 

Present onboarding forms dynamically based on employee work location

Built to scale

Check's API has powered the backend of more payroll products than any other company in the world. Robust and flexible features adapt to the unique needs of our partners. Our experience and payroll expertise make sure you are set up for success at every step.

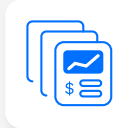

- 01 Check Console
- 02 Path to Payroll
- 03 Compliance

Check Console

A powerful dashboard to manage your payroll customers

- 

Manage customers and employees in a single source of truth
- 

Scale with ease leveraging enterprise-grade user roles and permissions
- 

See payrolls, documents, and employee data
