

Hi, SEP! we're Check.

We make it possible for software platforms to build a payroll product for their customers. Platforms benefit from solving a pervasive customer need, a customized payroll product for their business. Meanwhile, customers save time and reduce errors with payroll that's integrated into software they already love.

OUR MISSION

We're on a mission to make paying people simple.

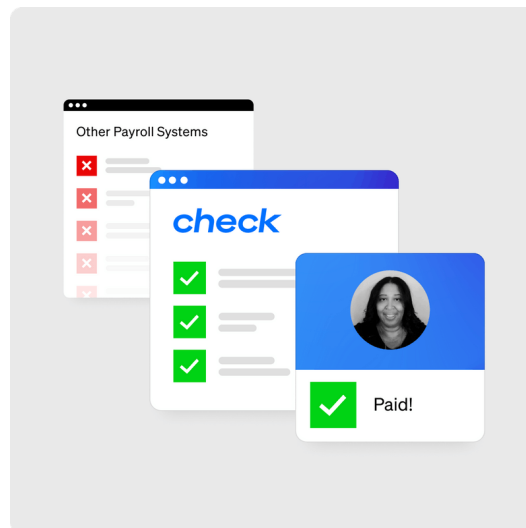

We started Check because it's too hard to run payroll. While vertical SaaS platforms, workforce management apps, and labor marketplaces have made front-office operations radically simpler for businesses large and small, almost none of these providers have been able to offer payroll to their customers.

WHAT WE DO

Making the complex, simple.

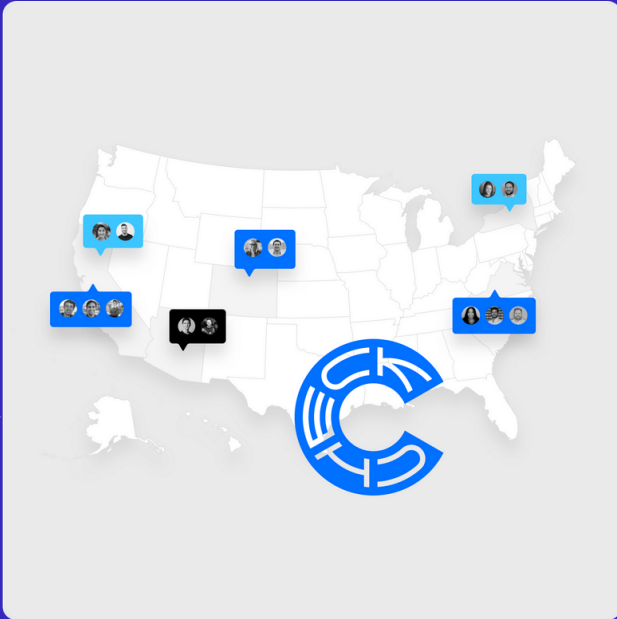

If you know anything about payroll, you know it's complex. With over 13,000 taxes across the country, payroll has been too daunting for platforms to build and manage. This challenge has left their customers — business owners — with clunky, one-size-fits-all payroll software that lives outside their operating system.

That is why we built Check. Two years in, we're proud to work with industry-leading software platforms across vertical SaaS, workforce management, and innovative labor marketplaces. And we're just getting started.

PROUD TO BE BACKED BY

WHO WE ARE

About our team

We are a diverse group of leaders, innovators, and payroll experts focused on making payroll infrastructure accessible and scalable. Founded in New York in 2019, we now have offices in New York and San Francisco as well as remote employees located throughout the US and Canada.
