CHEMTREC // Online Hazmat Training For Shipping Hazardous Materials //

Hazmat General, Safety and Security Awareness Online Training Course

Meet U.S. DOT general awareness training regulations

If you handle hazardous materials, the U.S. Department of Transportation requires you to take general awareness training every three years ([49 CFR, Subpart H, Section 172.704](#)). CHEMTREC's Hazmat General, Safety and Security Awareness course meets this requirement. It includes an introduction to hazardous materials/dangerous goods, and outlines training requirements based on shipping mode.

In addition, this 90-minute course covers which agencies set the requirements and it reviews the publications in which the requirements are outlined. Users get a better understanding of the transportation chain, including shipper and operator responsibilities, as well as dangerous goods classifications. The course also covers requirements for labels, placards, and hazard communication.
