Multi-discipline Services to Meet Your Needs

Merrick offers a full range of services across all disciplines to cover the majority of our clients' needs in-house. Our project managers and technical experts regularly tap into the expertise of all disciplines to identify new ideas, techniques, and solutions to offer the best value on projects.

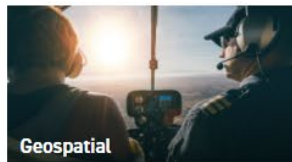

Contact us to learn more about the skills we can bring to your next project.

Engineering

Our diverse engineering experience, from planning and design to construction support, lets us find the right solution for your needs—whether the tried and true or the truly innovative.

Explore Our Engineering Services >

Geospatial

We are an industry leader in geospatial services, offering highly accurate remote sensing and mapping services. Merrick's geospatial team brings you the data that you need to make decisions with confidence.

Consulting

At Merrick, we take on many challenging, one-of-a-kind projects. On these projects, we understand the value of bringing in highly specialized, industry-specific expertise and thought leadership. We offer our clients access to two expert panels, one in energy and one in life sciences, to bring this top-level expertise on an as-needed basis.

Focused On Four Primary Markets

Finding Solutions for Our Clients

Merrick provides services in four primary markets: National Security, Infrastructure, Energy, and Life Sciences. Though we have a broad range of knowledge, our teams specialize in a particular market area to bring our clients the right solutions for the projects they encounter every day. We can then draw on the expertise in other market areas to bring new ideas and innovations to deliver a successful project that is customized to your needs.

Whatever your market, whatever your project scope, see what Merrick can do for you to ensure a high-quality result.

Merrick's commitment to our country is evident in our work on national security facilities. Our services include:

- [Aerospace](#)
- [Department of Defense](#)
- [Nuclear](#)

Infrastructure has been one of our core markets since Merrick's founding. Since then we've grown to include:

- [Land Development](#)
- [Transportation](#)
- [Water](#)
- [Whitewater](#)

Energy, Chemicals, Bioprocessing

Life Sciences

Merrick has a long history in the energy market. Our suite of services now include:

- [Bioprocessing](#)
- [Chemicals](#)
- [Oil and Gas](#)
- [Power](#)
- [Sustainable Proteins, Foods and Products](#)

Merrick provides full services to the life sciences market, including:

- [Biosafety and Biosecurity](#)
- [Government](#)
- [Private Industry](#)
- [University](#)
- [Global Health Security](#)
- [Sustainable Proteins, Foods and Products](#)
