Sentry Launch

Sentry Zip-In Vestibule

FEATURES AND BENEFITS

Rapidly deployable

The Sentry 13 is designed to deploy in under three minutes with only two people. No tools are required, only access to power which can be supplied via a small generator.

Easy to transport

The Sentry comes in a single carry bag with only three components. This vastly simplifies logistics, and decreases the likelihood of critical parts being lost.

Complexing made easy

The Sentry is our most easily complexed shelter yet with a frameless vestibule that simply zippers into the wall openings. This design creates a useable space between shelters, and minimizes storage and transport requirements. Sentry vestibules will be compatible with both Sentry 13 and Sentry 17 models.

Modular design

Wall panels for the Sentry attach via a heavy duty zipper and will be interchangeable between the two shelter sizes. Panels will be available in entryway, window/ducts, and solid configurations and can be ordered a la carte to suite your specific mission needs. Panels can also be left out entirely in hotter climates where only sun protection is needed.
