**3M™ Littmann University App**

Educate your students on the skill of auscultation with lung sounds, heart sounds and murmurs — many that have been vetted by physicians with reference to imagery, including echocardiograms where appropriate. Littmann University App, powered by eMurmur, gives instructors the ability to teach and test their students on the recognition of heart murmurs. It's been adopted by medical schools, nursing schools and physician assistant programs across North America. Pair it with Littmann Learning App to provide your trainees a bedside-like listening environment during instruction.

- Create a virtual classroom
- Access an extensive heart sound and murmur library and stream heart sounds to students
- Assess trainees' recognition of heart murmurs in group testing with immediate results for everyone
- Ideal for in-person, online and simulation teaching

**Licensing**

**School Managed**

School purchases license and seats— students pay the school a lab fee to use a seat.

**Student Managed**

School purchases license—students buy seats individually.

Plans can include a 3M™ Littmann® Cardiology IV™ Stethoscope and free content for any stethoscope user.

For more details and/or to set up a demonstration and free 30-day trial, contact a sales representative below.

## Develop auscultation skills.

### Auditory Repetition

Listening accurately for abnormal lung sounds, heart sounds and murmurs requires practice and repeated exposure to these sounds.

### Audio/Visual Integration<sup>1</sup>

Research shows that viewing the heart sounds while listening makes it easier for students to understand what they are hearing.

### Self-Testing

Listening skills deteriorate over time and the ability to self-assess one's accuracy is key to recognizing when more training is needed.

### Refresher Learning

Regularly scheduled refresher learning of heart sounds ensures that accurate murmur identification skills remain high over time.

<sup>1</sup>Each app is a training & education tool and not intended for patient diagnosis or treatment.
