Made with ultra-soft silicone, safe for sensitive areas and skin, it feels good wherever it touches you. Works with water-based lubricant (like Hims & Hers lube).

# Welcome to the main attraction

## Small but mighty

It'll be you waking the neighbors (high-five), not the vibrator. It buzzes quietly so you can stay discreet—without sacrificing any powerful vibrations.

## Vibration modes for your vibe

This vibrator balances simplicity and choice, because who really wants to pick from a million options. It has 3 different vibration patterns—all controlled by one button—so you can bring your partner or yourself to climax exactly how you want to.

## Great starter for couples

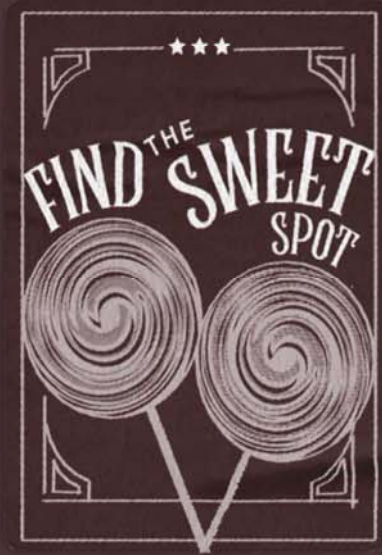

If you and your partner are new to using sex toys together, this is a great way to start. Many couples love it because they're small and easy to maneuver.

## Better orgasm for her

If your partner is a woman, clitoral stimulation is key for a fulfilling sexual experience. Use this vibrator to make sure all her rides have a peak.

## How to use a bullet vibrator alone or with a partner
