Welcome to POOL360!

POOL360 is designed for the specific use of registered pool professional customers of **SCP Distributors LLC**, **Superior Pool Products LLC**, and **Horizon Distributors Inc.** If you are a current customer, please register to establish your POOL360 account. If you would like to become a customer of **SCP Distributors LLC**, **Superior Pool Products LLC**, or **Horizon Distributors Inc.** please contact your [local branch](#) or call 1-888-GRO-POOL (476-7665) for the nearest location. This site combines the best features of our legacy B2B wholesale ecommerce site and our desktop catalog application (Sourcedisk). The site offers real-time integration into our ERP system like our current B2B wholesale site as well as a more graphical and powerful catalog presentation (images, schematics, etc.) like SourceDisk.

Here are some of the key features.

Improved Security

The site allows each customer to take control of how their internal users use the site. The security works as follows. Each person will register for an individual user account using the customer's account number and a web registration key (an be obtained from your local dealer) and basic billing and shipping address information. The first account registered will be the account administrator. Each account registered thereafter, will be registered with view only access. The account administrator can manage user accounts from the POOL360 application Manage Accounts utility found on the account info tab and elevate the other registered user's security as needed. The following levels are available for any account.

1. **Account Administrator** – user has full access to all account information and can manage other users on the account.
2. **Place Orders** – user can place orders on behalf of the account within the customer's credit limit.
3. **Place Orders with Limit** – user can place orders on behalf of the account but the account administrator has placed a limit on the amount any one order can be.
4. **View with Costs** – user can view the costs for products but cannot place orders on the customer's account.
5. **View Only** – user can view products and MSRP, but not costs.
6. **InActive** – the administrator can mark a user as inactive to disable their account if a user switches rolls or leave their company.

Improved Product Searching

The site is powered by the award winning Exalead enterprise search engine. While we continue to add functionality and further tune the search engine, it offers some significant improvements over the previous search in B2B and SourceDisk.

1. **Search by Manufacturer** - This was available in Sourcedisk, but often brought back too much information. In enterprise grade searching, the more information you add to a search query, fewer results should be returned. As an example, searching for Hayward Pump in Sourcedisk would bring back anything that matched on Hayward and anything that matched the word pump. The new site will bring back products that match both Hayward and is a pump, thereby reducing the amount of noise in the results.
2. **Search by Keywords**
3. **Search by Product Descriptions**
4. **Search and filter by Manufacturer Part #**
5. **Filter by Product Department**
6. **Filter by Product Lines**
7. **Filter by Wholegood vs Parts**
8. **Filter by Home Branch Stocking Status**

The Search results can be displayed as a list or as a grid allowing flexibility in how the information is viewed. Under the products menu, you will find the options to browse our catalog of products by the Manufacturer or by the Product Category.

Important Registration Notes:

- The first person in a company to register will be set up as Account Administrator, who can add other users and select permissions(view cost, place orders).
- The account can have multiple Account Admins.
- Users who register after the first are set up initially as View Only.
- To VIEW, ADD or EDIT users on the account, go to Account Info > Manage Accounts.
- To access your account on-the-go: Download the Mobile App to your smart phone or tablet. Search for "POOL360"
