

WaveTech uses the only FDA cleared non-invasive, non-medication and proven to be effective acoustic sound wave therapy on the market today. By reducing plaque build up in the small vessels, WaveTech treatments restore and rejuvenate blood vessels and nerves. This results in healthier blood vessels that work better, and result in improved blood flow. Our revolutionary treatment also causes new blood vessels to grow (a process known as neovascularization), as well as recruits and activates stem cells to the area. This all results in healthier tissues and overall improved health and wellness.

Meet our Physician

Dr. Frank, a native of Northbrook, Illinois, began his education at the University of Wisconsin- Stevens Point with a degree in Biology. After a 3-year hiatus of playing professional basketball at home and overseas, Dr. Frank continued his education at the Jefferson Medical College in Philadelphia. His training continued at Wake Forest Baptist Health, where he completed a fellowship in Neuro Rehabilitation.

Dr. Frank's interest in regenerative and anti-aging medicine became evident over the past few years as he began to treat different chronic medical conditions. He completed extensive training with the American Academy of Anti-Aging Medicine in efforts to treat the cause of the disease.
