World's first aggregator of AI and RPA platforms

OMNI lets you try any digital platform of your choice

The world's top 10 RPA platforms – all available in one place.

OMNI is the world's first and only aggregator of RPA platforms – get your business users to try and test any platform of their choice, build the automation workflows of their choice and save time and increase their productivity.

DIY prototypes – for DIY automation

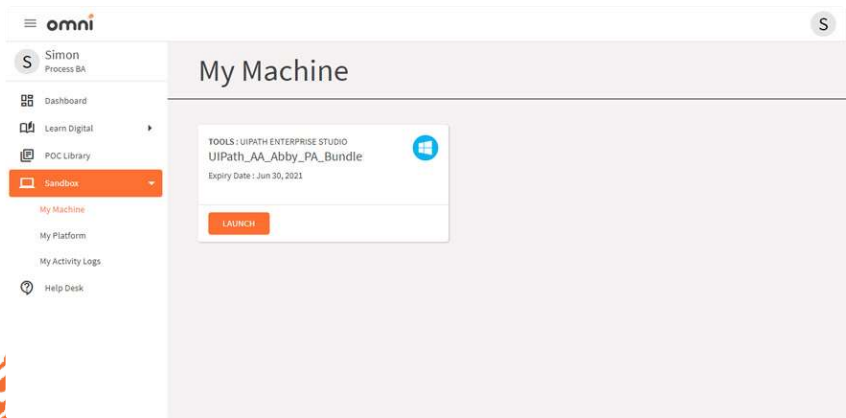

OMNI offers you DIY prototypes: 1,000+ use-cases and POC's already uploaded for ideation and execution. There is no need to procure these tools or dedicate servers or find datasets for your POC's. Try OMNI's sandbox to know more.

Be more confident about your vendor selection.

Know which platform is right for you, before you buy.

Try automation before you buy

OMNI offers you a way to risk-proof your automation journey. You can evaluate which technology platform and vendor would be right for your organization – before you buy. Reducing risk, increasing probability of success.

The one stop launchpad for your enterprise automation transformation

We enable you to build your own hub-and-spoke RPA Center of Excellence, all by yourself, by testing what works first: both platforms and vendors.

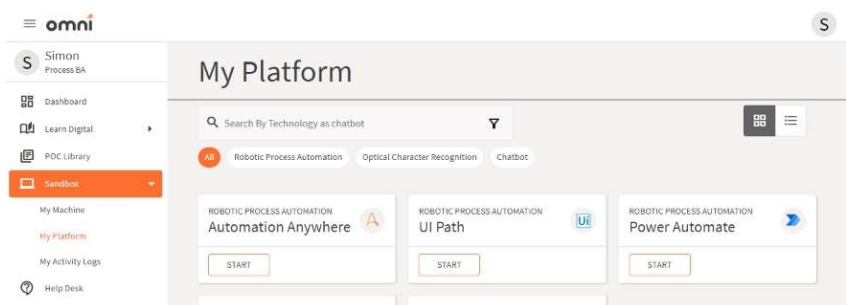

Accelerate your digital RoI, by supporting your citizen developers

Build your digital bench strength, by internal upskilling.

Not just another RPA learning platform

We offer a lot more than the typical RPA training platform. Our sandbox helps your citizen

developers get hands-on experience. This enables you to build your digital bench strength, by internal upskilling. Your citizen developers could 3X your speed-to-automation.

24*7 On-demand human coach

We help you build your enterprise RPA CoE. If your citizen developers need assistance in their journey, our 24x7 on-demand human coaches are there to guide and advise you.

1,000+ Downloadable POCs available on OMNI
