DATA CATALOG

Unify your data world

End data fragmentation by unifying data assets in a single, searchable catalog. Connect to Snowflake, Looker, dbt, Airflow and much more.

A team of data experts

We are on a mission to empower individuals and companies to unlock the value of data. This mission started when we created DataHub at LinkedIn. We're leveraging the learnings from that experience to build a modern, scalable, and cloud-first data catalog and discovery service. [Get in touch](#) if this sounds exciting!

TRUST

We are serious about security

As a data company, we know how important it is to keep data secure and private. That's why we've invested in security from the very beginning. We already support authentication via popular Identity vendors and our SOC 2 Type II certification is in progress. We will continue to invest in the most secure practices to keep your data safe.

DATA DISCOVERY September 27, 2021

Why Can't I Find the Right Data?

The modern data stack has helped democratize the creation, processing, and analysis of data across organizations. However, it has also led to a new set of challenges thanks to the decentralization of the data stack.
