### Deep Clean and Acid Rinse in One Step!

End Zone is both an extraction emulsifier and an acid rinse that leaves carpets squeaky clean and prevents resoiling caused by detergent residues. End Zone's powerful surfactants emulsify tough soils including sand and other particulates that pre-sprays just can't remove. End Zone then neutralizes carpet to a slightly acidic pH and its polymer technology helps prevent resoiling. **Save the extra step of an acid rinse with End Zone!** Works in hot or cold water and inhibits corrosion on your standard metal parts.

#### Dilution Ratios:

Portables: 2 oz. per 5 gallons water.

Truckmounts: 1 qt. per 5 gallons water.

RTU pH: 4.5-5 Contains: 1 gallon
