## Integrated Microsoft User Experience for Remote Workers

Remote workers are stranded on information islands, isolated from colleagues. At home or in satellite offices, they struggle to serve clients, suppliers, and partners because they can't find important emails or documents.

harmon.ie's suites of tools, harmon.ie 365 and harmon.ie Accord, make it easy for remote workers to share and find information across SharePoint, Microsoft Teams, and OneDrive, directly from Outlook, and to get help from colleagues concerning client, supplier, or partner requests, without leaving Microsoft Teams conversations.

Whether you are looking for an important email or document, or asking a colleague for help, harmon.ie products make your work easier by joining SharePoint, Teams, OneDrive, and Outlook.

# Products

"harmon.ie enables our employees to do information management without knowing they are doing information management... And that makes all the difference."

**Alexandre Singh**

Executive Director Business Solutions and Information Management
