

harmon.ie 365 Suite

Benefits

Drive Microsoft 365 Adoption

When all emails, chats, and files are seamlessly connected, users work more effectively with Microsoft 365 – SharePoint, OneDrive, and Microsoft Teams.

Be Productive While Working From Remote

Being able to find all your important documents and emails is critical to being independent when working 'from remote' – away from your team. With all your content in SharePoint and classified with metadata, working remotely has never been easier.

Increase Productivity Significantly

Focus on important business tasks by accessing content from across your Microsoft 365 apps.

Win with Information Management and Compliance

Intelligently classify important documents and emails so they can quickly be found for the ongoing business needs, or for compliance and retention requirements.

No More Missed Messages

Workers don't need to keep track of emails, chats, and documents across multiple apps, SharePoint locations, and Teams channels, ensuring nothing slips through the cracks.

Maintain focus

Outlook or Teams? It doesn't matter. Be part of the conversation wherever you spend your worktime, because discussions are seamless across Outlook and Microsoft Teams.
