

collab

# Transforming genius into generational wealth.

HOW WE INVEST

## ABOUT US

# Our Founding Focus

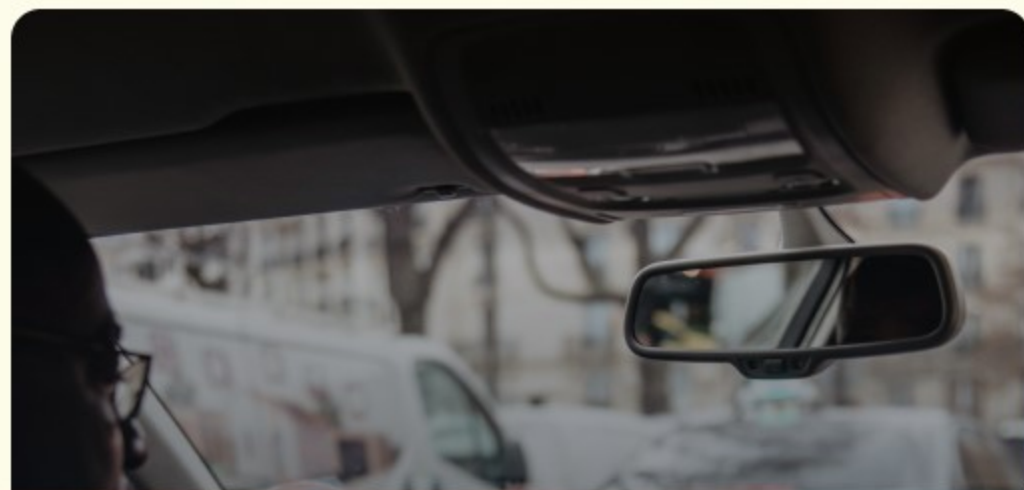

Collab Capital was built to invest financial, human, and network capital to effectively support, grow, and sustain Black-owned innovative businesses.

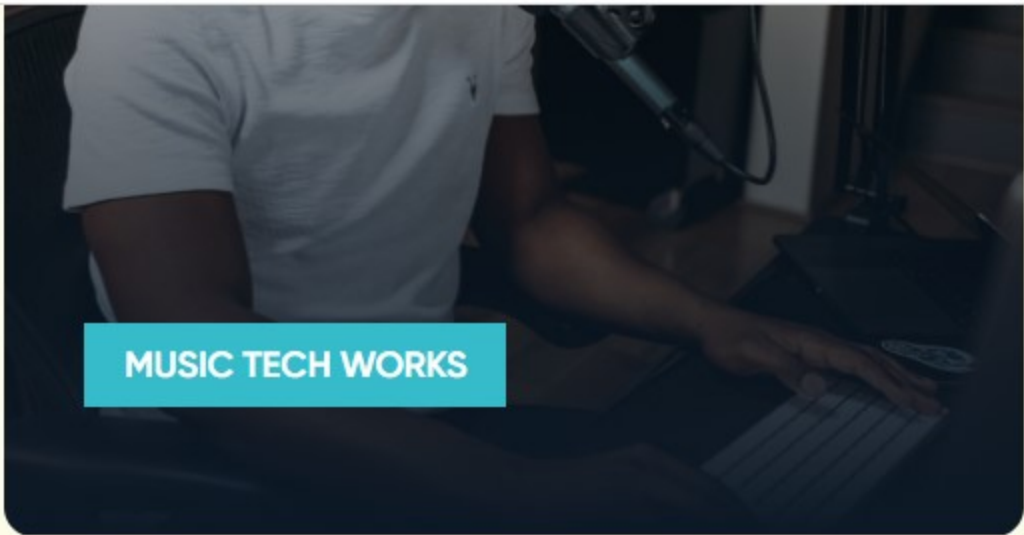

Our vision is to ultimately establish a pathway toward economic parity, for the Black community, through increased ownership within the innovation economy. That is how we will define success.

**WHO WE ARE**

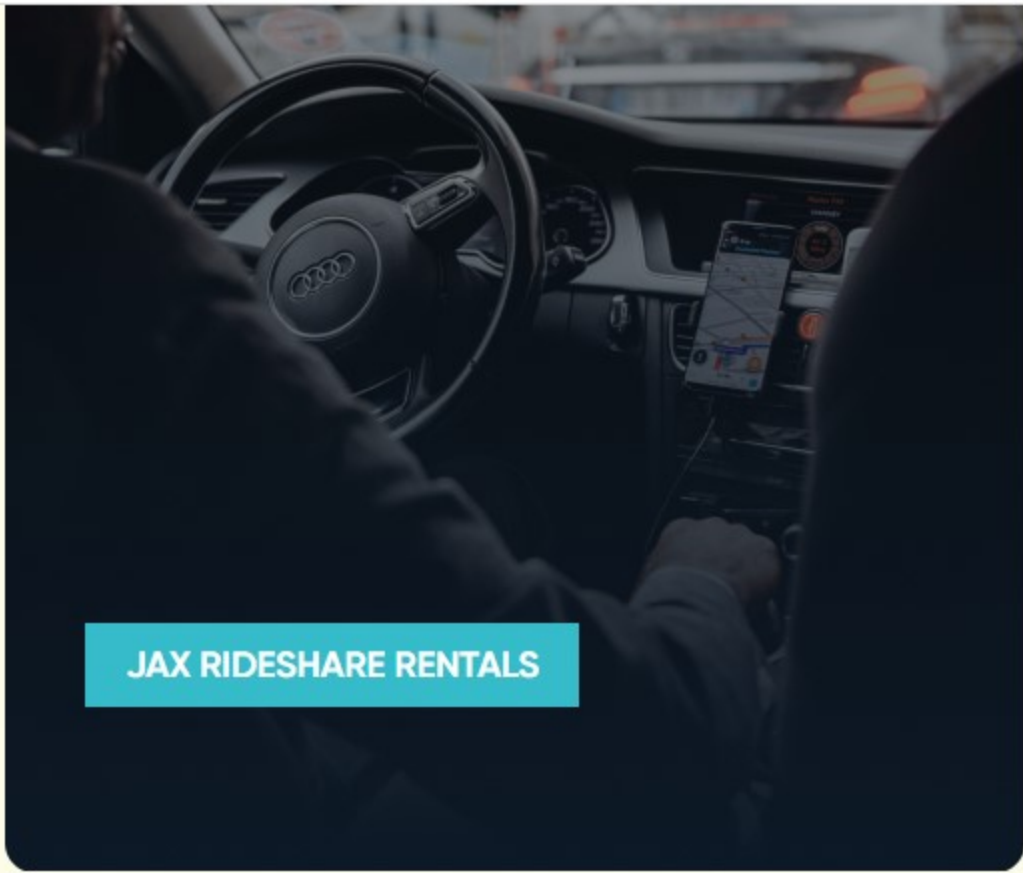

# Where capital and community converge to create a home for Black innovation.

We invest in Black founders because they represent both the fastest growing entrepreneurial segment and the most under-resourced and under-networked segment in the US.

## INVESTMENT PROCESS

# Our New Approach

Collab Capital's mission is to decrease the racial wealth gap by helping Black founded businesses overcome the funding and network challenges that often stifle their growth.

To accomplish this, we've designed a new investment product which aligns our interests with both the investors and founders we serve.
