# ANOVA Precision™ Reusable Silicone Bag

Half Gallon

Sous vide, storage, and more.

## Break up with single-use plastics for good

We've designed this reusable, BPA-free food safe bag to provide an airtight seal and be dishwasher safe for easy cleaning (top rack recommended).

Make your favorite sous vide meals, bag up your leftovers for easy storage, and even reheat with your Anova the next day for that same delicious meal all over again without increasing your plastic footprint.

## Simple to Seal

Easily remove air from the bag by hand and roll the top to close. Secure the closure with the pull tie and you're ready to cook.

## Sous Vide Ready

Perfect for sous vide cooking, including multi-day cooks. This bag can easily withstand temperatures from  $-40^{\circ}\text{C}$  all the way up to  $230^{\circ}\text{C}$ .

## Durable & BPA-free

Designed with the environment in mind, these bags are a durable, reusable alternative to single-use plastic. Food-safe, non-toxic and BPA-free construction means all you'll taste when cooking with this bag, is the delicious meal you're cooking inside.

## Fridge & Freezer-safe

Ideal for food storage or prepping ahead of time, these bags are safe to transfer straight from fridge or freezer to your sous vide cooking container.

## Easy to Clean

The bag easily turns inside out for the cleaning of all surfaces either by hand or by simply putting into the dishwasher.

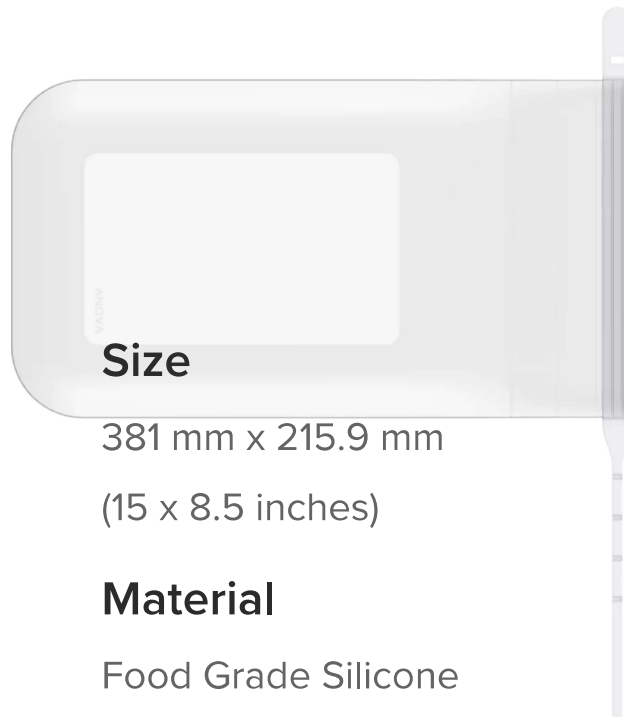

# Sustainable Sous Vide

Each year, millions of single-use plastics end up piling up in landfills and polluting our oceans. We designed the Anova Precision™ Reusable Silicone Bag with the environment in mind as part of the Anova Sustainability Initiative. This bag is a long lasting alternative to plastic.

Love my APO!

Replaced our older "toaster oven" with the APO and it makes everything from amazing toast to the best (and easiest) chicken wings to the fanciest of recipes. Love it and love the Anova company!

Exactly what I was looking for

A bit on the pricey side but they are flexible, deep, easy to secure, super simple to use. I originally got a set from Amazon that is super thick walled that it doesn't really make it air tight, and would trap air underneath the bags so they'd float more and they also had these super difficult to use plastic slide seals that just broke after a whi...[Read More](#)

Silicone bag

Pricey  
Only used once in SV so far.  
Worked as advertised.  
Consider adding clipping area at bottom for a weight when necessary.

Silicone bag

It's easier to use zip lock freezer bags. The silicone bag doesn't seem to lock as well

### Ok, but some issues

I really like how deep these bags are, and not wasting plastic everytime. My only issue is that they don't seal at all for me (possibly user error, but I've used them many times at this point), the depth of the bag lets me just rig it up so something is clipped to the top and I hang that part over the side and just try to keep the top from ever su...[Read More](#)
