Product Overview

The Phoenix DryMax BLE is a powerful LGR dehumidifier with rotomolded design. This powerful bluetooth dehumidifier makes tracking and managing jobs simple. It's a top choice for the drying and water damage restoration industry.

Designed for Long-Term Success

This Phoenix Commercial Dehumidifier is packed with features, from a compact reliable design to bluetooth capabilities, that make it best-in-class:

- **Powerful & Efficient:** Remove up to 80 pints of moisture per day while pulling just 5.7 amps. Air moves up to 170 CFM to quickly move damp air through the unit and dry spaces quicker than comparable models.
- **American-Made Reliability:** Backed with a 5-year sealed system warranty and 3-year condensate warranty, this durable powerhouse was built in Madison, WI.
- **Compact & Portable Dehumidifier:** Heavy-duty wheels, retractable handle and stackable design make it simple to move from jobsite to jobsite. Standing at just 12 x 17.5 x 21 in. (W x H x D), it's the smallest large capacity dehumidifier on the market. Integrated cord and hose wraps also make transport simple.
- **Upgraded Condensate Pump:** A newly-designed internal condensate pump is effective and reliable; it's backed with a 3-year separate warranty from the unit.
- **Upgraded Control Panel:** No more menu scrolling. A customizable control panel puts everything in one place, including readouts for air temperature and humidity for air going in and leaving the unit and run time.

Bluetooth Capability and Tracking

What are the benefits of using the bluetooth features built into the DryMAX BLE? They are countless:

- Take daily readings and receive readings that are logged every 15 minutes of use.
- Access previous readings if not on site at the job.
- Choose users to receive important alerts.
- Receive notifications such as the filter needs to be changed, the reservoir is full and more.

Additional Features

- **Optional Ducting:** A 10-inch exhaust ring can be added along with ducting to exhaust dry, healthy air into another location.
- **Long Power Cord:** The 25-foot power cord allows for versatile placement and use.
- **Condensate Pump and Hose:** Its 33-foot condensate hose and powerful internal pump means hassle free moisture removal even in large crawl spaces or industrial areas.
- **Air Filtration:** Its MERV-10 filter removes airborne particles down to 1 micron.
- **Available in Two Colors:** Pick the blue or red versions depending on your preference.
- **Status Indicator Light:** Displays green when the drying process is working as planned.
- **Simple Maintenance:** Four quick release fasteners make it simple to access the internal parts for any required maintenance.

Summary

This Phoenix industrial dehumidifier blends a compact and portable design with American-made reliability. It also makes tracking and reporting on jobs simple with the DryLINK app and bluetooth capability.
