“Your journey to being dry” with Zest bedwetting alarm is started. This one of a kind Enuresis Alarm with its ‘Patented Technology’ can stop bedwetting in weeks.

Technology

Simple and Easy to Use

Alarm is very easy to use by child and they can put it by themselves in the night after bedwetting

Sound and Vibration Alarm for Boys and Girls

We put a little magic into all our little boys and girls lives who have nighttime bedwetting problem

with Zest bedwetting alarm that has all the indispensable features an effective bedwetting alarm should have. Suitable for children ages 5 and older is designed to stop bedwetting the effective way. Alarm comes with 8 alert tones and three modes of operations to choose from sound and vibration, sound only and vibration only (discreet modes is available for events such as camps and sleepovers). This bedwetting alarm will help wake children upon detecting the first drops of urine.

accident occurs. Follow the instructions properly put the alarm portion to the pajama top. Run the cord under the pajama top. Attach the strong hold sensor to the outside of the underwear at the point where urination first occurs. Clean the sensor by rinsing under tap water for 2 to 3 seconds after each bedwetting accident to maximize your success.

Innovative Strong Hold Sensor Technology

Sensor is the most important component of a bedwetting alarm. The Zest bedwetting alarm comes with reliable Strong Hold™ sensor that has a large urine detection area that detects the urine immediately upon its occurrence. This sensor grips to the underwear with a tight hold. This ensures the sensor is in place all night even for the children who move a lot in the bed and will not accidentally come out at night so you never have to worry about missing a bedwetting event. This sensor is extremely reliable, for it triggers the alarm every time as soon as there is a bedwetting accident.

Save Time and Money

No need to waste money on expensive laundry detergents to wash a big load of sheets or buying

dippers you can save money buying this budget friendly microprocessor controlled alarm with complex algorithms which does two important things. First it alerts your child with sound-light-vibration alerts on detecting urine and wake up the user so they can use the bathroom and second, it ensures a safe treatment regimen and promotes confidence as boys and girls overcome bedwetting without medication.
