Co-Brand

Empower customers with new experiences and leading tech with metal cards from CompoSecure.

[LEARN ABOUT CO-BRANDED CARDS](#)

High-Security Documents

CompoSecure's state-of-the-art, secure manufacturing facility enables us to produce custom high security identification cards. We work with clients, like system integrators and homeland security departments in many countries, to build and manufacture cards that meet or exceed their specific requirements.

Cards include overt or forensic security features such as clear windows, embedded OVDs, kinegrams, holographic stripes, biometric/contactless technologies, rainbow guilloche printing and optically variable inks to name a few.
