Jeremy Klinebriel **TOP 100 REVIEWER**

★★★★☆ **More power than my other impacts.**

Reviewed in the United States on June 3, 2021

Size: 1/4" | Style: Impact Driver | **Vine Customer Review of Free Product** (What's this?)

Let me start by saying I'm 41 and have been using tools my whole life. I'm a tool nut. I love my tools. I have friends that use SATA hand tools and they was always great quality. I really like the tools but I've never owned any. I figured I would try this 1/4" impact out and see what kind of power it has. It's got the power. This has more power than my Dewalt impacts. As you can see in my video I had no problem driving a 3/8" lag bolt. It was not predrilled either. This is my new favorite impact and I have owned every major brand cordless tool out there. Every one. It's light weight and feels great in the hand. It's

not long like a lot of others so it will fit in tight areas. It has 3 speeds which is really nice for when fighting

Mike P. **VINE VOICE**

★★★★☆ **Was Good**

Reviewed in the United States on July 7, 2021

Size: 1/4" | Style: Impact Driver | [Vine Customer Review of Free Product](#) (What's this?)

This SATA 18-Volt 1/4-Inch Drive Hex Brushless Impact Driver Lithium-Ion Kit, 2 AMP Hour Batteries worked well when I first began testing it, I was pleased with the battery life, the compact size and weight, and the torque. If I wrote this review after the first week of testing this, I would probably have written a great review praising it for those qualities, but after that first week it performed a complete 180 and has been unreliable, it won't work without banging it against something, and even with full battery the torque is a fraction of what it was before.

Overall, this is a Jekyll/Hyde situation with one half being a compact, powerful, tool, while the other half is a weak, unreliable, paperweight. I wish this thing was built to last, but for now it is just a disposable tool that can't be trusted to work when you need it. 2/5 stars.

Dale **VINE VOICE**

★★★★☆ **EVERYONE NEEDS TO START SOMEWHERE**

Reviewed in the United States on May 20, 2021

Size: 1/2" | Style: Drill | [Vine Customer Review of Free Product](#) (What's this?)

Sata is a brand I've heard of a time or two, but never seen in person. They seem fairly new to the US market and this drill does not resemble any of their older ones that were sold elsewhere. Which I think is a good thing because those looked pretty...eh...cheap.

But this, this drill is really NICE! They did their homework to make a competitive, quality tool.

Overmolded grip feels really nice and not bulky. Drill is made of glass fiber reinforced plastic and the two halves of the clamshell housing fit together well. Chuck is knurled metal and operates with ease.

Drill has a brushless motor and has a good amount of torque. It'll bend your wrist! Included are two 2ah batteries which is pretty much standard fare for any drill / driver at this point. Drill has the battery meter built into it and not the batteries. Which is fine, but if you have a lot of batteries lying around you have to load them into the drill to check for charge. There is also a light in the base.

Olynomad

★★★★☆ **Good value and power for a 2ah batt**

Reviewed in the United States on June 26, 2021

Size: 1/4" | Style: Impact Driver | [Vine Customer Review of Free Product](#) (What's this?)

This is an upper end value tool that for the price it seems better than other value tools in the same price range. The quality of the tool is good not great but good. There is a noticeable amount of play in the chuck which doesn't seem to affect the performance, it's just more than what I'm used to. The variable speed trigger is quite jerky throughout power ramping and the batteries don't have a power gauge to indicate battery life but again at this price point I feel like the above issues could be overlooked as I haven't noticed any diminished performance issues. Compared to my Milwaukee Fuel m18 in terms of power and torque the Milwaukee is claiming 1600 inch lbs and the SATA chimes in at 1600 in lbs also so on paper they match up but with an equivalent battery in my Milwaukee it out performs the SATA handily but the SATA isn't a slouch either. It is able to sink a 3/8 x 6" lag bolt into a Douglass fir log with ease. The kit included the impact driver, (2) 2ah batteries a 4 amp (output) brick/slide in type charger that has on board battery diagnostics and a very nice hard sided durable plastic case that has plenty of space for everything listed above and even a bit of space for a small sized accessory case. This impact driver is a great value for what is offered.
