What is *leva*®?

leva is an FDA-cleared Digital Therapeutic that can help women **train** their pelvic floor muscles to help treat **urinary leakage**.

What is *leva*®?

leva is an FDA-cleared Digital Therapeutic that can help women **train** their pelvic floor muscles to help treat **urinary leakage**.

leva is an FDA cleared pelvic floor muscle trainer with visualization technology that can help patients target the muscles predominately responsible for maintaining continence.

Real-time interactive visualization with Renovia's app provides patients with programmed coaching sessions to optimize their pelvic floor muscle training.

Proprietary motion sensor technology shows a static and dynamic representation of a woman's vaginal profile at rest and with movement during pelvic floor muscle training.

Patients can complete their training in any private setting in less than 5 minutes, twice a day. Patients have the ability to track, review, and share actionable data through this innovative, non-surgical treatment.
