

No profiles, no followers, no endless content. Just one **authentic** connection per week.

The Mission

Landed is not a dating app, but a meaningful interaction with someone outside of your network. Each week, you receive a different match. **It is social media that supports your life, not the other way around.**

Minimalist

Landed has no interest in maximizing “engagement.” Each week, you are limited to interacting only with your match. No friends, no followers, nothing else.

Mindful

Our prompt encourages you to pay attention to your life and notice things you can be grateful for. This process has many scientifically proven benefits, including a deeper sense of well-being.

Serendipitous

Strangers inspire us to break our habitual patterns of presentation and venture beyond our comfort zones. Studies have shown talking to strangers improves mental health. Many find connecting in this way more freeing than talking to friends and family.

No Emojis

Landed functions exclusively on audio notes, which retain the full nuance of human expression but allow you to respond on your own time.

Test users:

“It allowed me to talk about things I normally wouldn’t consider

“When I need to come up with things I am grateful for, I realized

“It has helped me realize I am not alone in my struggles.”

talking about to people I
know.”

there are plenty.”
