## Hot-Dip Galvanizing in Houston, Texas

Valmont® Coatings- United Galvanizing has been delivering integrity, reliability, and satisfaction since 1970. We operate a state of the art galvanizing facility employing a staff dedicated to customer service. Our highly qualified managers provide the technical expertise required to complete a project efficiently and successfully. Our expansive property, northwest of Houston, provides hot-dip galvanizing, corrocote, and several value added services. Two structural kettles with working lengths of 41.5 feet and 60 feet, have a combined annual capacity of 80,000 tons, with flexibility to service a broad range of products.

Valmont Coatings is connecting you to the entire coatings process through innovative technology, improving your experience and saving you valuable time. The Valmont Coatings Connector® (VCC) is designed to optimize efficiency and keep you connected at every stage of the order process, delivering greater visibility— and confidence. VCC automatically communicates your order status in real-time on any device with Internet access. Gone are the days of uncertainty. Through automatic email and text notifications, you will know exactly when your project is received, the status of each step, and when your order is ready for pickup or delivery.
