Bamboo Health

Stories

CRITICAL CONTEXT AT THE POINT OF CARE

Bamboo Health's comprehensive suite of solutions supports thousands of hospitals, health systems, accountable care organizations (ACOs), post-acutes, health plans, provider organizations, health information exchanges, and community providers across the country to transform the way care is delivered.

Our Stories solution delivers relevant patient context at the right time to the right users in their workflow to enable smoother care transitions. Stories helps reduce potentially uncompensated and undercompensated care for the system while enabling better patient outcomes.

HITRUST CSF Certified

Bamboo Health operates entirely within the privacy and security requirements set forth with HIPAA, including the encryption of all data in transit and at rest. Stories is also HITRUST CSF® Certified, meeting industry-defined standards when it comes to managing risk.

Cost-Efficient Coordinated Care

We help ACOs improve the quality of care for patients while simultaneously succeeding under value-based care initiatives. Below are the 2019 Next Generation ACO results.
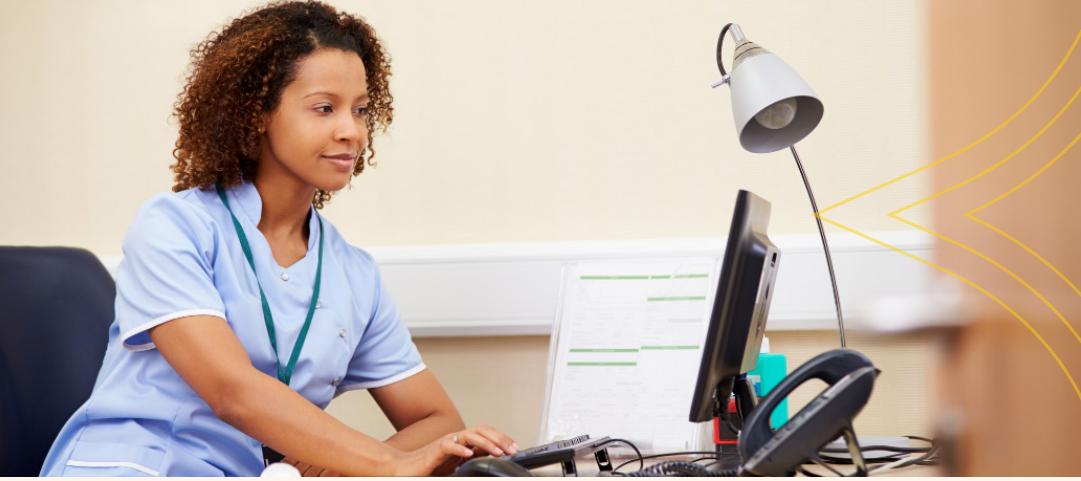

$263,780,912

Earned in shared savings through our national network of ACOs under the Centers for Medicare and Medicaid Innovation's (CMMI's) Next Generation ACO Model in 2019.

93%

Average pay-for-performance quality score achieved by our customers.

Bamboo Health

Improve Continued Care

Leverage the industry's first care transitions assistant that's embedded in provider workflows to make smarter, faster, and safer transition-of-care decisions.

Identify patients at risk for readmissions and unnecessary utilization.

Help transition emergency department high utilizers back to the community.

Enable clinician efficiency through electronic health record (EHR) integration (Epic and Cerner).

Reduce detective work with notifications on the ED Trackboard for care transitions.

Surface community relationships (Federally Qualified Health Centers, Behavioral Health organizations, ACOs, care management programs) for enabling community care transitions.

Customer Testimonial

"Having the integration in our EHR is huge. Our providers can quickly get the info that they need in real time, right within the patient chart; and it's helped us reduce unnecessary readmissions. If a patient has been admitted in the last 30 days, we can go into... Stories and determine if the patient actually needs to be readmitted or, based on their utilization history, direct them to a more appropriate care setting."
