

**StabilCam - Setting a new standard for safety and efficiency at your loading docks.**

**Accidents Happen. You Can Stop The Next One.**

Trailer separation accidents can be catastrophic for your employees and the organization. Trailer tip-over. Trailer creep. Trailer pop-up. All dangerous. Consider an enhancement to your current safety protocol to manage the movement of goods, reduce the risk exposure and eliminate accidents at the loading dock.

Prevent Forklift drivers from entering unrestrained trailers

Ensure front of trailer stabilization device is in place before loading or unloading

**The Gold Standard for Reliable Protection and Improved Dock Attendant Efficiency**

StabilCam, an enhanced verification system, sets the gold standard in ensuring stabilization by delivering reliable protection and improved dock attendant efficiency. (US Patent #10,377,587 B2)

- Double visual verification reassures you that the restraint is engaged properly with the trailer ICC Bar/RIG, confirms the front of trailer stabilization device is deployed, and ensures that dock attendants are following your safe operating protocol.
- Real-time, always-on communication from the monitor eliminates the need to walk outside.
- Large, easy-to-read monitor enhances the warning from red/green signal lights.
- Two high definition, infrared cameras for day & night viewing and available recording.
- Works with any restraint

**StabilCam, the new gold standard for double visual verification.**

**Always-On Visuals Improve Your Safety Protocol**

Side Camera #1 provides a real-time image of any trailer restraint device in use

Front facing Camera #2 provides a real-time image of any trailer stabilization device positioned at the front of the trailer is in place before loading or unloading a semi-trailer.

Dual image screen lets the dock attendant know that the truck restraint is deployed along with any front of trailer stabilization equipment to prevent trailer tip-overs before entering the trailer.

Compact, Easy-to-Mount Indoor Control Box

### ABOUT STABILJACK

StabilJack is the superior safety product for trailer stabilization. Accident prevention while loading and unloading semi-trailers is one of many safety exposures industrial manufacturing and distribution companies must account for in their safety policies, procedures, capital equipment purchases and financial risk management.
