

Why choose an EV?

Convenience

Skip the gas station and charge at home.

Responsibility

Lower your emissions and carbon footprint.

Low cost of ownership

Spend less on overall vehicle maintenance.

Fuel savings

Save money—electricity is less expensive than gas.

Tax incentives and rebates

Get money back for purchasing an EV and installing smart chargers.

Satisfying ride

Have fun driving a high-performance vehicle.

Smart tech

Experience the most advanced technology.

Why is BGE offering this program?

The EVsmart Program fuels progress on Maryland's Air Quality and Chesapeake Bay goals, which include having 300,000 zero-emission vehicles on the road by 2025. Studies show that about 125,000 EVs and 27,000 public chargers would need to be added to BGE's service territory. Through the EVsmart Program, BGE hopes to encourage more customers to adopt EVs.

What are the benefits of a Level 2 smart charger?

With a Level 2 smart charger, you can charge your EV up to six times faster than a wall outlet, adding up to 20 miles of range per hour of charging. You can also set charging reminders, schedule charging and track energy usage right from your smart charger app.

Who qualifies for the EVsmart residential Level 2 smart charger rebate?

Active BGE residential customers who have purchased and installed an eligible Level 2 smart charger after July 1, 2019, and have secure home Wi-Fi to operate their smart charger qualify for the rebate. Additionally, BGE must be able to access customer EV charging data.

What are the benefits of multifamily property chargers?

More existing and prospective tenants are expected to start requesting EV charging as an amenity. BGE's rebates help offset the cost of this investment. Home charging currently makes up 75% of all EV charging, so multifamily property managers and owners are influential in increasing EV adoption.

Driving the charge for electric vehicles

An Exelon Company

Introducing BGE's EVsmart Program

How and when an electric vehicle (EV) is charged plays a huge part in getting the most out of it. Whether you're an EV driver, considering an EV or even a multifamily property owner, BGE's EVsmart Program gives you the rebates, tools and information you need to charge faster, smarter and more conveniently than ever before.

For more information, call [866.414.1256](tel:866.414.1256), email EVsmart@bge.com, or visit BGE.com/ElectricVehicles.

EV 101

Through our online EV toolkit, you can learn the basics of EV charging, use savings calculators to compare the cost of gas versus electric-powered vehicles, view state and federal tax incentives available for EV owners, and locate an EV dealer in your area. Check out the toolkit at BGE.com/ElectricVehicles.

Residential Charger Rebate

If you are a BGE residential customer, live in a single-family house (attached or detached) and install a Level 2 smart charger at your home, you may be eligible for a rebate up to \$300*. Upgrading to a Level 2 smart charger allows you to charge your vehicle significantly faster than with a standard charger. It also allows you to better control (and even schedule) when your EV charges by using an optional smartphone app.

Note that to participate you must connect your charger to your home Wi-Fi and agree to share your charging data with BGE. Learn more or apply for a rebate at BGE.com/ElectricVehicles.

Multifamily Property Rebate

If you are a multifamily property manager or owner, you may be eligible to receive incentives up to \$25,000* for the installation of Level 2 smart chargers or DC Fast Chargers at your property. Adding EV chargers as an amenity increases your property's value to current and prospective residents, especially as electric vehicles become more mainstream.

Public Charging Network

BGE will launch its own EV charging network in Maryland by fall 2019. EV drivers will have the option to charge their vehicle at any of the 500 BGE-owned Level 2 smart chargers or DC Fast Chargers throughout the BGE service area. BGE's charging rates will be comparable to other public charging options and give you the flexibility and peace of mind to drive farther.
