A Full Security Suite To Protect Your Digital Life

Our Antivirus engine is trusted by millions of people across the globe. With daily virus definition updates, real-time antivirus protection, and outstanding virus rate, you can rest assured your digital security is in good hands

Anti-Malware

Our advanced anti-malware engine will protect your digital world against infections caused by many types of malware

Real-Time Antivirus

Scan and instantly block threats in real-time before they get a chance to infect your system (Premium Feature)

Spyware Removal

Spyware software's sole purpose is to gather information about you to share it with other entities that can financially benefit from it

Adware Cleaner

Adware, or software created to aggressively advertise at you, is often unknowingly downloaded and can be very hard to remove

Anti-Ransomware

Avoid becoming a victim of malicious attacks which encrypt users files and demand a ransom payment to decrypt them

Data Breach Search

We can identify if your email & passwords have been compromised as part of an online data breach

Advanced WebShield

Advanced protection against malicious websites and block attempts to steal your personal information

100% Compatible

Benefit from our advanced antivirus protection across your desktop computer, laptop, smartphone & tablet

Optimization

We all want our Systems at their full potential. Whether it be your smartphone, laptop or tablet, we have some great features to help you improve your devices performance

Faster Computer

Reduced startup times, reduced lag, and faster high CPU program running times

Eliminate Tracking Cookies

Although tracking cookies are not directly harmful, they do raise privacy concerns which we can help to overcome

Junk Cleaner

While junk files do not cause any harm, they waste disk space unnecessarily and can safely be cleaned from your system

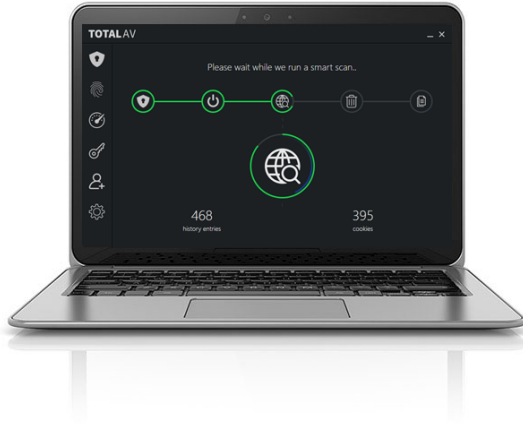

Browser Cleanup

Cleaning your browser data will improve security and speed
