Halo+

Optical

Product Classification : Portable projector

Specialty : 3D

Standard Resolution : 1920 x 1080 (1080p)

Compatible Resolution : 2K/4K

Image Mode : HDR10

Display Technique : DLP

Display Chip : 0.33" DMD

Luminance : 700 - 900 ANSI Lumens

Lens : High Light Transmission Coated Lens

Projection

Keystone Correction : Auto Keystone

Correction for both vertical and horizontal

Throm Ratio : 1.2 : 1

Projection Method : Forward / backward / hang ceiling

System

RAM : 2GB

Storage : 16GB

Speaker : 2 x 5W

System : Android 10.0

Mirroring Display : Chromecast built-in

Ports

Input Ports : DC x 1 HDMI 2.0 x 1 USB 2.0 x 1

Output Port : 3.5mm headphone x 1

WiFi : Dual-band 2.4/5GHz , 802.11a/b/g/n/ac

Bluetooth : Bluetooth 5.0/BLE

Electrical

Noise : < 30dB

Power : AC100-240V , 50/60Hz

Power Dissipation : 90W

Other

Size : 113.5 x 145 x 171.5 mm

Battery Capacity : 59.454Wh

Charger : x 1

Manual : x 1

Product Weight : 3.53 Pounds

Power Plug : x 1

Bluetooth Remote Control : x 1

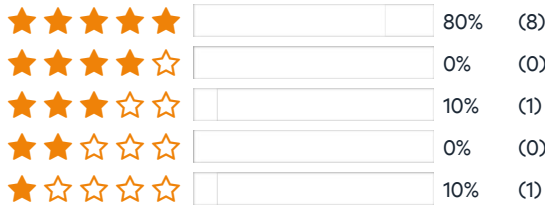

Getting Started with Your XGIMI Projector

1. Setting Up Your XGIMI Projector
2. Using Your XGIMI Remote Controller
3. Installing Software Onto Your XGIMI Projector
4. Casting Media Sources to Your XGIMI Projector
5. Connecting External Devices to Your Projector
6. Using Bluetooth to Link Your Audio Devices
7. Using the 3D Feature on Your XGIMI Projector
8. Updating Projector Firmware & Switching HDMI Versions

EXCELLENT

Worth Every Penny. Works flawlessly in all respects.

[FYI: the one star from G.B. might be the result of not following directions, as I first did (though "tech support" should know this and have told him). If you turn off the Halo+, as opposed to "hibernating", you cannot turn it on using the remote control and must press the "on/off" button on the device twice. As the manual points out, this is a feature to prevent accidental "power on."].

Terrible experience - do not buy from this company!

I gave it 1/5 stars because 0/5 is not an option. Stay away from Xgimi. They sold me a defective unit (doesnt turn on >90% of the time), will not refund me or replace with a new device.

Summary:

The projector arrived fairly quickly after I purchased it which was great (purchased on Jan 11th and arrived on Jan 15th). Unfortunately I wasnt able to try it for ~12 days after I received it due to work/traveling/etc. Once I used it I loved it when it would ACTUALLY turn on. Sometimes it takes ~30 mins of attempting to turn it on to actually get it going. I'm a 34 year old person btw, very comfortable using this type of device so. I tried troubleshooting with all the possible steps, read all reviews, forums, etc. Not much out there but still i tried switching power outlets, pressing button on the device, using the remote,, the app, hold pressing for >5 seconds, waiting different time intervals to re-attempt turning it on, etc. Its just random. sometimes it works. but I'd sav about 90% of the time. I trv for 30 minutes and

still it doesnt turn on. Once it actually works it is a great product, with the one exception of the clearly under-publicized issue with Netflix (essentially can only use the bootleg app for it which doesnt work very well, you cant even search for content only play things already saved to your list or previously watched).

I reached out to customer service explaining my issue and what I attempted to fix it on Feb 8th, still dont have a solution to my problem. I wish I had just asked for a refund when I first tried it but I assumed I was doing something wrong and kept giving it the benefit of the doubt. Problem is they only have a 15 day return policy. So now, even though I reached out to customer support in under 30 days from purchase and arrival, im getting the run around. After a call which took ~45 mins on hold for someone to pick up, many emails, sending a video showing my problem, and many days later etc. the best they can do for me is to send me a USED/REFURBISHED unit to replace my defective brand new one, AND they want me to pay for the shipping for my unit to get to their wearhouse first, wait until they get it and only then will they ship a the used/refurbished replacement. I asked for a refund instead, they refused. I asked to be given credit for this purchase and use that credit to buy an even pricier projector (Horizon Pro ~twice as expensive) since when this actually works its a great product, they refused.

Long story short, while the product is great when it actually turns on, so far I've had a terrible experience trying to resolve my issue (which is still unresolved). I REGRET BUYING ANYTHING FROM XGIMI, SHOULD HAVE GONE TO NEBULA OR OTHER COMPETITOR WITH BETTER TRACK RECORD.

(attached is the same video I sent them in my emails with customer service)

Wonderful Projector

Video quality and brightness are very good for a portable projector (a major upgrade from the Nebula capsule projector we had before this). The projector starts very quickly from hibernation mode and the automatic keystone correction makes it super easy to move the projector around the house and fire it up with no fuss. Audio quality of the built-in speakers is adequate but underwhelming. Very pleased with this purchase. Also customer service was very helpful with my shipping questions.

Love it

I've got several portable/semi portable projectors including the screeneo S6 and the Optoma UHL55 and the MogoPro. I keep coming back to this one because the sound is good and I use it in my son's room for our nightly video routine. I really like the auto positioning and the auto keystone. I know it takes a little away from the quality, but on the wall I'm using it's really not critical.

HALO PLUS

ITS AWESOME! I bought it for camping trips and movie nights on the patio. But I have been watching my shows on the wall in my bedroom instead of the TV. It's super clear. Easy to use. Sounds great. I honestly can't think of anything bad to say. It will dissappoint if you want to watch it in a room with lights on. It's a total dark movie set up. Anything more than just a low dim light will degrade the image quality. But in the dark. It's movie theater quality. Maybe even better. Love this thing. Works great on a tripod . Would definitely buy it again. In fact. I might buy a few for Christmas presents.
