Description

Achieve your best night's sleep with the MOLECULE ArcticLUX™ 12" Cooling Mattress with MOLECULEshield™ antimicrobial cover treatment that protects against bacteria, fungus, mold, mildew, odors, and degradation due to microbial growth so you can sleep cleaner all year long.

With cool-to-the-touch fiber technology woven into the cover of the mattress, you are assured that the benefit will never wash out, leaving you comfortably cool each and every night. The two-inch layer of MolecularFLO™ extreme open-cell foam provides 3x the airflow vs. traditional memory foam. It maintains consistent airflow even when compressed and transfers heat away from the body to provide the perfect temperature for optimized rest and wellness. Beyond temperature regulation, the MOLECULE ArcticLUX™ mattress includes RecoveryFLO™ foam zoned for hyper-targeted, self-adjusting support for different areas of your body. The targeted zoned foam contours to your body and relieves critical pressure points from head to toe for premium comfort. Supporting it all is a thick 7" firm foundation, ContourFLO Plus™, to foster healthy spine alignment. The contoured surface promotes even more airflow and heat transfer.

Maximize your health and performance during the day by making the best decisions for the night with MOLECULE. MOLECULE is a leading-edge performance, recovery-focused, and clean sleep brand that prioritizes sleep as a recovery tool. With decades of scientific research, MOLECULE is trusted by elite athletes, including Russell Wilson, Alex Morgan, and Michael Phelps, helping them rest and recover while they sleep so they can maximize their performance during the day. Rest assured, all foam used in MOLECULE mattresses is manufactured to the strictest environmental standards. They use a patented technology called variable pressure foaming that uses an air-sealed chamber and carbon beds to scrub emissions by 97% vs. standard manufacturing. All foam used in MOLECULE products are CertiPUR-US® certified and made in the USA.*
