

EQUIPMENT SOURCING + CUSTOMIZATION

Fleeting for Our Customer

Always finding ways to be a resource for our customers is a priority at Bulk. That's why we've made it a point to foster a large equipment network and develop long-standing relationships with specialty equipment manufacturers. This gives us the ability to be able to source anything from hard-to-find machines to large spreads of equipment for your operation.

Long-Term Partnerships

We have long-standing partnerships with specialty equipment manufacturers to provide site-specific custom solutions which improve efficiency and drive down cost.

Diverse Network

Being brand independent requires us to maintain a wide-ranging network of equipment dealers and brokers. This helps satisfy the extensive scope of customer needs that we service.

Comprehensive Setup

When sourcing and setting up machines, they're put through a rigorous inspection in our shop to make sure any issues are identified and corrected before sending them out to customer job sites nationwide.

THE BULK DIFFERENCE

An Outside of the Box Alternative to the Traditional Model

Brand independence affords us the ability to provide a wide array of assets and expertise that fit customer needs no matter the manufacturer.

We're able to rent custom fleets, maintain any brand of heavy equipment whether we own the machines or not, and our reach spans nationwide.

Brand Independent

Target Zero Downtime

Across United States

Benefits of the Bulk Model

Rental Model

- Supplies the best equipment for the job, no matter the brand
- Rents equipment and maintains ownership, providing long-term budget consistency
- Includes parts and service in fixed cost
- Provides backup assets for guaranteed uptime
- Replacements and rebuilds of assets over time
- Fleet rentals include embedded management and dedicated on-site technicians

Service Model

- Inspects, maintains, and repairs equipment no matter the brand
- Eliminates the need to keep a high-level tech on payroll
- Access to expert technicians with skillsets on a wide variety of OEM platforms
- Provides parts sourcing expertise to supply hard-to-find and best-priced parts
- Manages all of your mixed fleet maintenance and repair needs
- Traveling technicians available nationwide

Targeting Zero Downtime

Maximizing machine uptime is a major component to our customer's success, which means it's essential to our success as well. Here's how we do it:

- Staffing dedicated technicians at customer sites to immediately fix problems
- Implementing a rigorous preventative maintenance program to maintain equipment and identify issues before they become a problem
- Rotating equipment in and out of service to provide continuous uptime
- Offering backup machines that can immediately jump into action when another machine goes down
